Acknowledgement	II
Abstract	III
Abstrak	IV
Chapter 1: Introduction	
1.1 UV radiation (UVR)	1
1.2 Solar UV radiation	2
1.3 Solar radiation and zenith angle	3
1.4 Level of solar UV radiation	4
1.4.1 Stratospheric ozone	4
1.4.2 Time of day	5
1.4.3 Time of Year	5
1.4.4 Latitude	5
1.4.5 Altitude	5
1.4.6 Weather condition	6
1.4.7 Reflection	7
1.5 Attenuation of solar UV radiation	7
1.5.1 Rayleigh scattering	7
1.5.2 Mie scattering	8
1.5.3 Cloud reflection and absorption	9
1.5.4 Aerosols attenuation	9

1.6 Ozone	10
1.6.1 Ozone depletion	10
1.6.2 Ozone and chlorofluorocarbon (CFCs) compounds	11
1.7 Health effects from UV radiation	12
1.7.1 Eye	13
1.7.2 Skin	14
1.8 Dosimetry method for solar UV radiation	16
1.8.1 UV detector	16
1.8.1.1 Spectroradiometers	16
1.8.1.2 Broad band instruments	18
1.8.1.2.1 Thermal detectors	18
1.8.1.2.2 Photoelectric detectors	18
1.8.1.3 Personal dosimeters	18
1.9 UV radiation safety	19
1.9.1 UV index	19
1.9.2 UV radiation exposure limits	20
1.9.3 Protection against solar UV radiation	21
1.10 UV radiation units	22
1.11 Objective of the project	22

Chapter 2: Thermoluminescence

2.1 Introduction	24
2.2 Luminescent and trap center	25

2.3 A general model for thermoluminescence	26
2.4 The glow curve	28
2.5 Typical TL response	28
2.6 Measurement of UV radiation using TL materials	30
2.6.1 Transferred method	30
2.6.2 Intrinsic method	31
2.7 Commercial TLD	31
2.7.1 CaF ₂	33
2.7.2 CaSO ₄	33
2.7.3 AL ₂ O ₃ :C	34
2.8 Oxide, Borate and sulfate compound phosphor	34
2.8.1 Gd ₂ O ₃ :Eu	34
2.8.2 BaSO ₄ :Eu	35
2.8.3 MgO	36
2.9 Doped alkali halides	36
2.9.1 NaCl:Ca(T)	36
2.9.2 KBr:Eu ³⁺	37
2.9.3 KCl:Eu ³⁺	37
2.10 Handling technique of TL dosimeter	37
2.10.1 Annealing	38
2.10.2 Irradiation	38
2.10.3 Storage and handling	38
2.10.4 Readout	38
2.10.4.1 TLD reader	38

2.10.4.1.1 Manual TLD reader model 3500	39
2.11 Estimation of TL parameters	44
2.11.1 Mathematical analysis	44
Chapter 3: Experimental set-up and method	
3.1 Introduction	49
3.2 Preparation of the powder	51
3.2.1 Fabrication of TLD chips	51
3.2.2 The range of percentage error in the reading of the chips	55
3.3 Calibration	56
3.3.1 Calibration of Minolta UV meter	58
3.3.1.1 Calibration result	59
3.3.2 Calibration of deuterium UV lamp	60
3.3.2.1 Irradiance measurement of deuterium UV lamp at 8 cm	62
3.4 Measurement of UV radiation using TL materials	63
3.4.1 Lanthanide oxide ($\text{Ln}_2\text{O}_3:\text{RE}^{3+}$)	63
3.4.2 Commercial TLD	63
3.5 Exposure	64
3.5.1 UV lamp	64
3.5.1.1 Safety with UV lamp	65
3.5.2 Sunlight	66
3.6 The electronic circuit noise of TLD reader	67
3.6.1 PMT noise	69
3.6.2 Background noise	69

3.6.3 Test light	69
3.6.4 The noise reading of TLD reader	69
3.7 Reading of the TLD chips	71
3.8 Thermal and light fading	71
3.9 Reproducibility	72
3.10 Reuse of TLD materials	72
3.11 Estimation of TL parameters (E & s)	74
3.12 Measurement of solar UV radiation using UV meter	74
3.13 Calibration of TL material	76
Chapter 4: The sensitivity of Ln₂O₃ to UV radiation	
4.1 Introduction	78
4.2 Sensitivity to UV radiation	79
4.2.1 Y ₂ O ₃	79
4.2.2 La ₂ O ₃	81
4.2.3 Gd ₂ O ₃	83
4.3 Sensitivity to sunlight	85
4.3.1 Long period of exposure	85
4.3.2 Short period of exposure	86
4.4 Glow curve	88
4.4.1 Glow curve after direct exposure to UV lamp	90
4.4.2 Glow curve for Y ₂ O ₃ after 24 hours of exposure	92
4.4.3 Glow curve for La ₂ O ₃ after 24 hours of exposure	92
4.4.4 Glow curve for Gd ₂ O ₃ after 24 hours of exposure	92

4.5 Stability of TL intensity at room temperature	95
4.6 Effect of light on TL intensity	97
4.7 conclusion	97

Chapter 5: The sensitivity of commercial TLD to UV radiation

5.1 Introduction	100
5.2 Sensitivity to UV radiation	101
5.3 Sensitivity to sunlight	103
5.4 Glow curve	103
5.4.1 UV Lamp	103
5.4.2 Sunlight	105
5.5 Effect of light on TL intensity	107
5.6 Stability of TL intensity at room temperature	107
5.7 Reproducibility chart	110
5.8 Conclusion	110

Chapter 6: Observation of solar UVR in Campus of university of Malaya

6.1 Introduction	112
6.2 Average daily UV irradiance	113
6.3 Accumulation of UV radiation	116
6.4 Hourly percentage variations of UV radiation	118
6.5 Direct and indirect measurement of solar UV radiation	118
6.6 The effect of the climate changes in the intensity of solar UV radiation	119
6.7 Conclusion	121

Chapter 7: Conclusion and further suggestion	122
Reference	125
Appendix	132
