## CHAPTER 1 AN OVERVIEW: PESTICIDES AS ENDOCRINE-DISRUPTING CHEMICALS

1.1	Introduction	2
1.1.1	Pesticides	2
1.1.2	Organochlorine (OC) pesticides	3
1.1.3	Organophosphorus (OP) pesticides	5
1.2	Pesticides in Malaysia	5
1.2.1	Pesticide usage	5
1.2.2	Pesticides in the Malaysian environment	7
1.3	Pesticides as endocrine-disrupting chemicals	13
1.3.1	Definition of endocrine-disrupting chemicals (EDCs)	13
1.3.2	Mode of actions of EDCs	14
1.3.3	Transport and distribution of EDCs in the environment	15
1.3.4	Effects in wildlife populations	16
1.3.4.1	Reptiles	17

1.3.4.2	Fish	19
1.3.4.3	Birds	20
1.3.4.4	Mammals	20
1.3.5	Human exposure to EDCs	21
1.3.6	Health effects of EDCs on humans	22
1.4	A short review: Endosulfan	24
1.4.1	Introduction	24
1.4.2	Effects of endosulfan on mammals (rats)	25
1.4.3	Effects on humans	27
1.4.4	Environmental fate of endosulfan	28
1.4.5	Summary of the characteristics of endosulfan	29
1.4.5.1	Chemical identity	29
1.4.5.2	Physical and chemical properties	29
1.4.5.3	Exposure guidelines	30

## **CHAPTER 2 A SURVEY OF PESTICIDE RESIDUES IN BLOOD OF SCHOOL CHILDREN IN PENINSULAR MALAYSIA**

2.1	Introduction	32
2.2	Experimental	33
2.2.1	Chemicals	33
2.2.2	Apparatus	33
2.2.3	Stock solutions	33
2.2.4	Sampling and data collection	33
2.2.5	Blood sample collection	34

2.2.6	Method of analysis	34
2.2.7	Calibration and quantification	35
2.2.8	Gas Chromatograph-Mass Spectrometer (GC-MS)	35
2.2.9	Statistical analysis	36
2.3	Precision, accuracy and recovery	42
2.4	Results and discussion	43
2.4.1	Efficiency of the analytical method	43
2.4.2	Precision of the GC injections	43
2.4.3	Blood samples	43
2.5	Conclusion	59

## CHAPTER 3 ANALYTICAL METHODOLOGY FOR ENDOSULFAN AND ITS METABOLITES

3.1	Introduction	61
3.2	Method development for residue analysis of endosulfan and its metabolites for the present study	61
3.2.1	Plasma	61
3.2.2	Tissue sample	62
3.2.3	Analysis of endosulfan and its metabolites in biological samples	63
3.2.4	Solid phase extraction (SPE)	65
3.3	Extraction procedure for endosulfan and its metabolites (endosulfan sulfate and endosulfan diol) in plasma	66

3.4	Extraction procedure for endosulfan and its metabolite (endosulfan sulfate) in tissue without freeze-drying	68
3.4.1	Sample clean-up utilizing SPE	68
3.4.2	Determination of extractable organic matter (EOM)	70
3.5	Experimental	71
3.5.1	Chemicals	71
3.5.2	Apparatus	71
3.5.3	Stock solutions	71
3.5.4	Standard solutions	72
3.5.5	Preparation of buffer	72
3.5.6	Sample preparation for plasma	72
3.5.7	Sample preparation for tissue	72
3.5.8	Gas Chromatograph-Mass Spectrometer (GC-MS)	72
3.5.9	Calibration curve	73
3.5.10	Quantification	74
3.6	Precision, accuracy and recovery	74
3.6.1	Precision and efficiency of the analytical method	74
3.6.2	Blank	75
3.6.3	Recovery	75
3.7	Results and discussion	76
3.7.1	Calibration curve	76
3.7.2	Efficiency of the analytical method	79
3.7.3	Precision of the repeated GC injections	80
3.8	Conclusion	82

## **CHAPTER 4 ACUTE EXPOSURE: TOXICOKINETICS AND EFFECTS OF SINGLE ADMINISTRATION OF ENDOSULFAN IN RATS**

4.1	Introduction	84
4.2	Experimental	85
4.2.1	Materials and methods	85
4.2.2	Preparation of the treatment materials	86
4.2.3	Animals	86
4.2.4	Experimental design and treatment	86
4.2.5	Necropsy	87
4.2.6	Residue analysis	87
4.2.7	Radioimmunoassay (RIA)	87
4.2.8	Statistical analysis	87
4.3	Results and discussion	88
4.3.1	Toxicokinetics profile of endosulfan	88
4.3.2	Body weight and organ weights changes	91
4.3.3	Residue analysis	104
4.3.4	Hormonal analysis of testosterone	105
4.4	Conclusion	107

## **CHAPTER 5 SUBACUTE EXPOSURE: EFFECTS FOLLOWING REPEATED ADMINISTRATION OF ENDOSULFAN IN RATS**

5.1	Introduction	109
5.2	Experimental	110

5.2.1	Materials and methods	110
5.2.2	Preparation of the treatment materials	111
5.2.3	Animals	111
5.2.4	Experimental design and treatments	111
5.2.5	Necropsy	112
5.2.6	Residue analysis	112
5.2.7	Radioimmunoassay (RIA) and hormonal analyses	112
5.2.8	Histological evaluation	113
5.2.9	Statistical analysis	113
5.3	Results and discussion	114
5.3.1	Body weight and organ weights changes	114
5.3.2	Residue analysis	117
5.3.3	Hormonal analyses of testosterone (T), T3 and insulin levels	119
5.3.4	Histological evaluation	121
5.4	Conclusion	122

## CHAPTER 6 CONCLUSION

6.1	Conclusion	150
6.2	Recommendation for future study	154
