List of Figures	xi
List of Tables	xiii
Abstract	xiv
1. CHAPTER 1 – INTRODUCTION	1
1.1. Problem Statement	2
1.2. Research Objectives	3
1.3. Scopes of the Research	4
1.4. Significance of the Research	4
1.5. Methodology	5
1.6. References	6
1.7. Thesis Organization	6
2. CHAPTER 2 – LITERATURE REVIEW	
2.1. Introduction	10
2.2. Overview of Disaster Recovery Planning	11
2.2.1. Off-Site Storage	11
2.2.2. Backup Site	11
2.2.3. Users	11
2.2.4. The Need For Risk Management In Disaster Recovery Planning	12
2.3. Strategies of Disaster Recovery	12
2.3.1. Remote Mirroring	12
2.3.2. Disk Channel Duplexing	12
2.3.3. Standby Database	13
2.3.4. Standby Application	13
2.3.5. Standby Operating System	13

2.3.6.	Standby Shared Machine	13
2.3.7.	Displacement	14
2.3.8.	Replacement	14
2.4.	Overview of Local And Remote Data Backup System	15
2.4.1.	Data Storage Devices	15
2.4.1.1.	Magnetic Tape Storage	15
2.4.1.2.	Magneto-Optical Storage	15
2.4.1.3.	Magnetic Disk Drives	16
2.4.1.4.	Redundant Arrays Of Inexpensive Disks (RAID)	16
2.4.2.	Data Backup Strategies	18
2.4.2.1.	Backup Documentation, Testing And Schedules	18
2.4.2.2.	Local Data Backup System	19
2.4.2.2.1.	Workstation-Based Backup	20
2.4.2.2.2.	File-Server-Based Backup	20
2.4.2.2.3.	Dedicated Backup Server	20
2.4.2.2.4.	Host-Based Backup	20
2.4.2.2.5.	Comparison Of Local Data Backup Options	21
2.4.2.3.	Remote Data Backup System	21
2.4.2.3.1.	Off Site Storage Vendor	22
2.4.2.3.2.	Company Internal Off Site Storage	22
2.4.2.3.3.	Backup over the WAN to the Main Server	22
2.4.2.3.4.	Electronic Vaulting	22
2.4.2.3.5.	Comparison Of Remote Data Backup Options	23
2.5.	Review On File Transfer Protocol	23
2.5.1.	Perspective	23
2.5.2.	FTP Model	24
2.5.3.	FTP Service Commands	25
2.5.4.	FTP Replies	27
2.6.	Synthesis Of Local And Remote Data Backup System	29

3. CHAPTER 3 – THE NEED OF RISK MANAGEMENT IN DISASTER RECOVERY PLANNING

3.1.	Introduction	30
3.1.1.	The Network Computing System	30
3.1.2.	Definition of Distributed Computing Systems	31
3.1.3.	Vulnerabilities in Distributed Computing Systems	31
3.2.	The Need Of Risk Management	33
3.2.1.	Risk Analysis	33
3.2.1.1.	Identification and Prioritization of Assets	34
3.2.1.1.1.	Identification and Prioritization of Data	35
3.2.1.2.	Risk Identification	36
3.2.1.2.1.	Threats and Vulnerabilities	37
3.2.1.2.2.	Natural Disasters	37
3.2.1.2.3.	Deficiency on Network Management	38
3.2.1.2.4.	Deficiency on System Maintenance	38
3.2.1.2.4.1.	Y2K Crisis	38
3.2.1.2.5.	Network Security Threats	40
3.2.1.2.5.1.	Computer Virus Crisis	42
3.2.2.	Risk Assessment	43
3.2.2.1.	Methodology of Risk Assessment	44
3.2.3.	Identification of Network System Requirements	45
3.2.3.1.	Prevent Data Losses	45
3.2.3.2.	Minimizing Network Downtime	45
3.2.3.3.	Fault Tolerant System	46
3.2.3.4.	Monitoring System	47

4. CHAPTER 4 – OBSERVATION AND DESIGN OF DATA BACKUP STRATEGY IN DISASTER RECOVERY PLANNING

4.1.	Introduction	48
4.2.	Observation On A Business Organization	48

4.2.1.	Network Architecture	49
4.2.2.	Backup Strategies	50
4.3.	Implementation Of Risk Analysis	50
4.3.1.	Identification And Prioritization Of Data Assets	50
4.3.2.	Risk Identification	52
4.3.2.1.	Centralization Of Server Backup	52
4.3.2.2.	Inadequate Separation Between Backups And Data Center	52
4.3.2.3.	Lack Of Automation Control	52
4.3.2.4.	Bandwidth Limitation	53
4.3.2.5.	Weak Security	53
4.4.	Design of Local And Remote Data Backup System	53
4.4.1.1.	Solution for the Risk in Centralization of Server Backup	55
4.4.1.1.1.	Benefits Of Distributed Local Backup Stations	55
4.4.1.1.1.1.	Better Network Performance	55
4.4.1.1.1.2.	Increased Flexibility	55
4.4.1.1.1.3.	Time Efficiency	56
4.4.1.2.	Solution for The Risk of Inadequate Physical Separation	56
4.4.1.3.	Solution for The Risk of Lack in Automation Control	56
4.4.1.4.	Solution for The Risk of Bandwidth Limitation	57
4.4.1.5.	Solution for The Risk of Weak Security	57
4.4.2.	Issues Raised In System Designing	57
4.4.2.1.	Remote Data Backup System	58
4.4.2.2.	Benefits Of Remote Data Backup System	58
4.4.2.2.1.	Protect Against Region-Wide Disasters	58
4.4.2.2.2.	Eliminate Data Loss	58
4.4.2.2.3.	Recover Data Quickly	59
4.4.2.3.	Remote Backup Versus Local Backup	59
4.4.2.3.1.	Drawbacks Of Local Backup	60
4.4.2.3.2.	Superiority Of Remote Backup	60

5. CHAPTER 5 – IMPLEMENTATION OF LOCAL AND REMOTE DATA BACKUP SYSTEM

5.1.	Introduction	61
5.2.	Requirements Of System	61
5.3.	Local and Remote Data Backup System	62
5.3.1.	Local Data Backup Module	62
5.3.2.	Remote Data Backup And Restore Module	65
5.3.2.1.	FTP Connection Setup Sub-Module	66
5.3.2.2.	Remote Data Backup Sub-Module	68
5.3.2.3.	Remote Data Restore Sub-Module	70
5.3.3.	Scheduled And Incremental Backup Module	72
5.3.3.1.	Scheduled Backup Sub-Module	72
5.3.3.2.	Incremental Backup Sub-Module	73
5.3.4.	Log Files Module	74

6. CHAPTER 6 – TESTING AND RESULTS

6.1.	Introduction	78
6.2.	Purpose and Hypothesis	78
6.2.1.	Purpose	78
6.2.2.	Hypothesis	78
6.3.	Testing	79
6.3.1.	Testing Venue	79
6.3.2.	Testing Schedule and Participants	79
6.3.3.	Problems	80
6.3.4.	Procedures and Results	81
6.3.4.1.	Local Data Backup Module	81
6.3.4.1.1.	Procedures	81
6.3.4.1.2.	Results	83
6.3.4.2.	Remote Data Backup Module	85
6.3.4.2.1.	Procedures	85

6.3.4.2.2.	Results	87
6.3.4.3.	Remote Data Restore Module	88
6.3.4.3.1.	Procedures	88
6.3.4.3.2.	Results	89
6.3.4.4.	Scheduled Backup Module	91
6.3.4.4.1.	Procedures	91
6.3.4.4.2.	Results	92
6.3.4.5.	Incremental Backup Module	95
6.3.4.5.1.	Procedures	95
6.3.4.5.2.	Results	96
6.4.	Discussion	97
6.4.1.	Evaluation	97
6.4.2.	System Strengths	97
6.4.3.	System Drawbacks	98
7.	CHAPTER 7 – CONCLUSION AND FUTURE ENHANCEMENT	
7.1.	Introduction	99
7.2.	Achievements	100
7.2.1.	Theoretical Knowledge in Disaster Recovery Planning and Risk Management	100
7.2.2.	Theoretical Knowledge in Network Management and Data Backup Strategies	101
7.2.3.	Theoretical Knowledge in File Transfer Protocol	102
7.2.4.	Practical Knowledge in Designing Data Backup Strategy	102
7.2.5.	Practical Knowledge in Implementation of Local and Remote Data Backup System	103
7.2.6.	Other Achievements	103
7.3.	Future Enhancement	103
7.4.	Conclusion	104
