ABSTRACT

This project is to study dynamic modeling of cell flow for an ATM network using Simulink tools. The ATM network consists of a maximum of four nodes configured into single hop, multi hop, ring, mesh and star topology. The dynamic simulation will examine the cell flow (bit per second), cell dropped cell received and link utilization for above topology.

ACKNOWLEDGEMENTS

It is impossible to complete this dissertation with my own efforts, a lot of people have contributed to it. I would like to express my appreciation to every of them here. First of all, I would like to thank Assoc. Prof. Dr. Selvanathan Narainasamy, my supervisor for his invaluable guidance and advice throughout the development of this dissertation. Special thanks to Mr. Abdullah Gani, Mr. Ibrahim, Mr. Ling Teck Chaw and Mr. Woo Chaw Seng for taking their precious time in examining the document.

Thousands of thanks to my bosses at UM Multimedia Development Center, Assoc. Prof. Dr. Sapiyan Baba, the director and Assoc. Prof. Dr. Ahmad Hashem, the deputy director for their unlimited supports and understandings in both my work and study. And not forgetting my colleagues at MDC, thanks for their considerations in work while I was concentrating on the dissertation.

Thanks to my fellow coursemates for sharing their knowledge generously and their company throughout the duration of time.

Always, my dearest family members, grateful for their continuous support in whatever things I did, have done and will do.

Last but not the least, to friends who have prayed for me and to Him who have given me wisdom and strengths to complete the dissertation successfully.

TABLE OF CONTENTS

ABSTRACT	i
ACKNOWLEDGEMENTS.....	ii
TABLE OF CONTENTS.....	iii
LIST OF FIGURES.....	vi
LIST OF TABLES.....	vii
CHAPTER 1: INTRODUCTION	1
1.1 INTRODUCTION TO ASYNCHRONOUS TRANSFER MODE (ATM).....	1
1.2 QUALITY OF SERVICE (QoS) IN ATM.....	2
1.3 ATM NETWORK SIMULATION.....	5
1.4 NETWORK SIMULATION TOOLS.....	6
1.4.1 NIST ATM/HFC Network Simulator.....	6
1.4.2 Netsim.....	8
1.4.3 REAL.....	10
1.4.4 OPNET.....	11
1.4.5 OMNET++.....	12
1.4.6 INSANE.....	13
1.5 INTRODUCTION TO SIMULINK.....	14
1.6 OBJECTIVE OF THIS PROJECT.....	15
1.7 SCOPE OF THIS PROJECT.....	15
1.8 ORGANIZATION OF REPORT.....	16
CHAPTER 2: ATM NETWORK AND MODELING.....	17
2.1 ATM NETWORK TOPOLOGY.....	17
2.2 ATM SWITCH.....	18
2.2.1 Overview.....	18
2.2.2 Performance.....	19
2.2.3 Queuing Methods.....	20
2.2.4 Buffer Management.....	21
2.3 ATM B-TE.....	22
2.4 ATM APPLICATION.....	22
2.5 PHYSICAL LINK.....	23
2.6 ATM INTERNETWORKING.....	24
2.6.1 Overview.....	24
2.6.2 ATM Network Operation.....	24

2.6.3. ATM Signaling and Addressing	25
2.6.4 ATM Routing Protocol	26
2.7 TRAFFIC MANAGEMENT AND CONGESTION CONTROL IN ATM NETWORK.....	28
2.7.1 Overview	28
2.7.2 Traffic Management Framework	29
2.7.3 Traffic Control Functions	31
2.7.4 Congestion Control Approaches.....	33
2.8 ATM NETWORK SIMULATION	34
2.9 ATM NETWORK MODELING	35
CHAPTER 3: SIMULATION AND SIMULINK.....	37
3.1 SIMULATION.....	37
3.1.1 Basic Concepts	37
3.1.2 Continuous versus Discrete	38
3.1.3 Stochastic versus Deterministic.....	38
3.1.4 Monte Carlo Simulation	39
3.1.5 Discrete Event Simulation	39
3.1.6 Event-Driven versus Time-Driven in Discrete Event Simulation.....	40
3.1.7 Computer Simulation.....	40
3.2 PROBABILITY CONCEPTS.....	41
3.2.1 Overview	41
3.2.2 Random Variables.....	42
3.2.3 Important Distributions	42
