| Abstract | i |
| Acknowledgements | |
| 1. INTRODUCTION | |
| 1.1. Historical perspective | 1 |
| 1.2. Nomenclature | 2 |
| 1.3. Structure of zeolites | 3 |
| 1.3.1. Framework structure | 4 |
| 1.4. Synthesis of zeolites | 9 |
| 1.4.1. Role of organic template | 11 |
| 1.5. Characterisation of zeolites | 11 |
| 1.5.1. Microscopy | 13 |
| 1.5.2. Spectroscopy | 13 |
| 1.5.2.1. X-ray diffraction | 13 |
| 1.5.2.2. Infrared spectroscopy | 14 |
| 1.5.3. Thermogravimetric analysis | 14 |
| 1.6. Properties of zeolites | 15 |
| 1.6.1. Ion-exchange property | 15 |
| 1.6.2. Acid-Base property | 16 |
| 1.6.3. Thermal stability | 16 |
| 1.6.4. Shape selectivity in zeolites | 17 |
| 1.7. Application of zeolites | 20 |

| | |
|---|----|
| 1.7.1. Non-catalytic uses | 20 |
| 1.7.2. Catalytic uses | 21 |
| 1.8. Industrial applications | 26 |
| 1.9. Scope of the present study | 28 |
| References | 29 |
| 2. EXPERIMENTAL METHODS | |
| 2.1. Materials | 32 |
| 2.2. Synthesis of zeolite-Y | 32 |
| 2.3. Preparation of cation-exchanged zeolites | 33 |
| 2.4. Physicochemical methods | 34 |
| 2.4.1. X-ray diffraction studies | 34 |
| 2.4.2. Thermogravimetric analysis | 38 |
| 2.4.3. Infrared spectroscopy | 40 |
| 2.4.4. Surface area measurements | 47 |
| 2.5. Catalytic activity | 51 |
| 2.5.1. Gas-Chromatographic analysis..... | 51 |
| 2.5.2. GC-Mass spectrometric analysis | 54 |
| 2.6. Determination of coke deposited in the zeolite | 55 |
| 2.7. Experimental set-up | 56 |
| References | 58 |

3. ALKYLATION OF ANILINE WITH *n*-PROPANOL AND ISOPROPANOL OVER ZEOLITES

| | |
|---|----|
| 3.1. Introduction | 59 |
| 3.1.1. Alkylation of aromatics with olefins | 59 |
| 3.1.2. Vapour-phase alkylation of aromatics..... with alcohols | 60 |
| 3.1.3. Vapour-phase alkylation of aniline with | 61 |
| olefins and alcohols | |
| 3.2. Experimental | 63 |
| 3.2.1. Characterisation of products | 64 |
| 3.3. Results | 66 |
| 3.3.1. Alkylation of aniline with isopropanol | 66 |
| 3.3.2. Alkylation of aniline with <i>n</i> -propanol | 68 |
| 3.4. Discussion | 70 |
| 3.5. Conclusion | 82 |
| References | 84 |

4. DEACTIVATION OF CATALYST IN ANILINE ALKYLATION

| | |
|---|----|
| 4.1. Introduction | 87 |
| 4.2. Experimental | 90 |
| 4.3. Results | 90 |
| 4.3.1. Study on the stability of Na-Y zeolite | 90 |
| 4.3.2. Study on the stability of Ce-Y zeolite | 91 |
| 4.4. Discussion | 92 |

| | |
|-----------------------|----|
| 4.5. Conclusion | 97 |
| References | 99 |

5. ALKYLATION OF HETEROCYCLES OVER ZEOLITE

| | |
|--|-----|
| 5.1. Introduction | 102 |
| 5.2. Experimental | 105 |
| 5.3. Results and Discussion | 112 |
| 5.3.1. Alkylation of pyridine with isopropanol..... | 112 |
| 5.3.2. Alkylation of pyrrole with isopropanol..... | 116 |
| 5.3.3. Alkylation of thiophene with isopropanol..... | 122 |
| 5.3.4. Molecular transformation of pyridine, pyrrole and thiophene over H-Y zeolite | 126 |
| 5.4. Conclusion..... | 139 |
| References..... | 140 |

Appendix : Publication entitled " Studies on the alkylation of aniline with *n*-propanol and isopropanol on ion-exchanged zeolites."
