LIST OF FIGURES	vi
	<u>page</u>
CHAPTER 1 : INTRODUCTION	1
1.1) A Review on Rheology	1
1.1.1) Definition	1
1.1.2) General Aspects of Rheology	2
1.1.3) Some Rheological Properties	3
1.1.3.1) Fundamental Rheological Variables	4
1.1.3.2) Viscosity	5
1.1.3.3) Yield stress	6
1.2) Newtonian & non-Newtonian Behaviour	7
1.2.1) Description of Newtonian & non- Newtonian Behaviour	7
1.2.2) Description of non-Newtonian fluid behaviour in shear	11
1.2.2.1) Shear-rate-dependent viscosity	11
1.2.2.2) Normal-stress effects in steady shear flows	11

1.2.3) Classification of non-Newtonian fluids	12
1.2.3.1) Time-independent non-Newtonian fluids	12
<i>Bingham plastics</i>	13
<i>Pseudo-plastic fluids</i>	14
<i>Dilatant fluids</i>	15
1.2.3.2) Time-dependent non-Newtonian fluids	17
<i>Thixotropic fluids</i>	17
<i>Rheoplectic fluids</i>	18
1.2.3.3) Viscoelastic materials	18
1.3) A Review on Colloidal System	20
1.3.1) Background	20
1.3.2) Stability of a Colloidal Dispersion	22
1.4) A Review on Interparticle Forces	27
1.4.1) Electrostatic and Van der Waals Forces	27
1.4.2) Steric Forces	32
1.4.2.1) A mixing effect	32
1.4.2.2) An entropic effect	33
1.4.3) Hydration Forces	35
1.4.4) Bridging Forces	36

1.4.5) Charged Patch Interaction	38
1.4.6) Hydrophobic Forces	40
1.4.7) Depletion Forces	41
1.5) Measurement Methods	43
1.5.1) Drag flows	43
<i>Sliding plates</i>	43
<i>Concentric Cylinder Rheometer</i>	44
<i>Cone and Plate Rheometer</i>	45
<i>Parallel Disks</i>	47
<i>Vane-in-cup</i>	47
1.5.2) Pressure-driven flows	49
<i>Capillary Rheometer</i>	49
<i>Slit Rheometer</i>	50
<i>Axial annular flow between parallel plates</i>	51
1.6) Previous Studies on ZrO ₂ and TiO ₂	52
CHAPTER 2 : EXPERIMENTAL	58
2.1) Materials	58
2.2) Methods	61
2.2.1) Preparation of Samples	61
2.2.1.1) The Treatment of TiO ₂ powder	65

CHAPTER 3 : RESULTS AND DISCUSSIONS	67
3.1) A Review on Treated TiO ₂	67
3.2) Cyclohexane multi carboxylic acids	68
3.3) Amphoteric amino acids	91
3.4) Copolymers	111
3.5) 2-hydroxyethyl cellulose of different molecular weights	117
CHAPTER 4 : CONCLUSION	135
SUGGESTIONS	137
REFERENCES	138
APPENDIX A : The structures of the additives	
APPENDIX B : Publications
