

## TABLE OF CONTENTS

### Preface

Original Literary Work Declaration	ii
Abstract	iii
Abstrak	iv
Acknowledgements	v
Table of Contents	vi
List of Figures	viii
List of Tables	ix
List of Symbols and Abbreviations	x
<b>1. Introduction</b>	<b>1</b>
1.1 Introduction	1
1.2 Background of the Study	1
1.3 Problem Statement	2
1.4 Goal and Objective of the Study	4
1.5 Scope and Limitation of the Study	4
1.6 Methodology of the Study	5
1.7 Arrangement of the Dissertation	6
<b>2. Literature Review</b>	<b>7</b>
2.1 Evolution of Agile Manufacturing	7
2.2 Implication of Agile Manufacturing	13
2.3 Enabling Technology of Agile Manufacturing	14
2.4 Definition of Quality	17
2.5 Flexible Manufacturing System	19
2.6 Total Productive Maintenance	21
2.7 Just in Time	25
2.8 PDCA Cycle	31
2.8.1 PDSA Cycle	34
2.9 Developing a Manufacturing Strategy	35
2.10 Method and Technique Selected	38
<b>3. Research Design and Methodology</b>	<b>39</b>
3.1 Introduction	39
3.2 PDSA Cycle	39
3.3 Plan Phase	40
3.3.1 Company Selection	42
3.3.2 Company Profile	42
3.3.3 Project Description	45
3.3.4 Problem Identification	57
3.3.5 Define Aim and Objective	62
3.3.6 Formation of Project Team	62
3.3.7 Selection of Method and Theory	63
3.3.8 Impact Assessment	65
<b>4. Data Collection and Analysis</b>	<b>71</b>
4.1 Introduction	71
4.2 Do Phase	71
4.2.1 Framework for Data Collection	72
4.2.2 Data Collection before Implementation	73

4.2.3	Implementation of Manufacturing System	81
4.2.4	Data Collection after Implementation	86
<b>5.</b>	<b>Result and Discussion</b>	<b>88</b>
5.1	Introduction	88
5.2	Study Phase	88
5.2.1	Data Presentation and Analysis of Data	88
5.2.2	Data Screening	93
5.3	Act Phase	95
<b>6.</b>	<b>Conclusion</b>	<b>97</b>
6.1	Conclusion	97
6.2	Recommendation	97
	<b>REFERENCES</b>	<b>98</b>

## LIST OF FIGURES

Figure	Title	Page
Figure 1.1	Methodology of the study	5
Figure 2.1	A conceptual model to illustrate the concept and enabler of AM	17
Figure 2.2	Inventory Hides Problems	30
Figure 2.3	Relationship between Lot Size and Setup Cost	31
Figure 2.4	PDCA cycle	31
Figure 2.5	Classification of tools in each section	34
Figure 2.6	PDSA cycle and functions of each phase	35
Figure 2.7	Model for improvement and its 3 question	35
Figure 2.8	Operations Strategy Framework: From Customer Needs to Order Fulfillment	37
Figure 3.1	PDSA cycle and the tasks for each phase	39
Figure 3.2	Modified PDSA cycle and the tasks of each phase	40
Figure 3.3	Tasks done in plan phase and their corresponding tools	41
Figure 3.4	Organization chart	46
Figure 3.5	Plant layout and the main areas of the plant	47
Figure 3.6	Raw material depot (material tank) and its arrangement of machines	48
Figure 3.7	Flow of material in fertilizer processing area	49
Figure 3.8	Schematic diagrams for the GT layout	51
Figure 3.9	Processes of the machines in the GT cell and the flow of material	52
Figure 3.10	Conveyor belts of the GT cell	53
Figure 3.11	Weighing machine located below conveyor	53
Figure 3.12	Totalize weighing machine located below conveyor	54
Figure 3.13	Mixing machine of the GT cell	54
Figure 3.14	Packaging machine of the GT cell	55
Figure 3.15	Raw material depot of the GT cell	55
Figure 3.16	Three stages involved in the GT cell	56
Figure 3.17	Pareto chart (loss of money value versus issues) in March	58
Figure 3.18	Cause and effect diagram for loss of material and its causes	59
Figure 3.19	Loss of material occurs at raw material depot (stage 1)	60
Figure 3.20	Loss of material occurs at stage 2	61
Figure 3.21	Uneven weight distribution and hill of material	61
Figure 3.22	Pills and stones mixed in the raw materials create uneven weight distribution	62
Figure 3.23	Dusty environments around various machines	66
Figure 3.24	Formation of soil at various machines	67
Figure 3.25	Increase in weight on the conveyor	67
Figure 3.26	Schematic diagram of speed sensor and how it is arranged	68
Figure 3.27	Formation of soil on the roller of speed sensor	69
Figure 3.28	Relationships of cause root and the sub-problems	70
Figure 4.1	Schematic diagram showing framework of data collection and how the loss of material is calculated	73
Figure 4.2	Effectogram for March	79
Figure 4.3	Installation of feedback and control system (PID) in a weight feeder and how it functions	83
Figure 4.4	Installing PID on weight feeder and how the PIDs are arranged in a rack	84
Figure 4.5	Improved totalize weighing machine with PID and how it functions	86
Figure 4.6	Installing PID on totalize weighing machine and	86

	how the PIDs are arranged	
Figure 5.1	OEE and MTBF of 9 months	90
Figure 5.2	Monthly output for 9 months	91
Figure 5.3	Loss of material (% per hour) for 9 months	92
Figure 5.4	Reworked material (tons per month) for 9 months	93
Figure 5.5	Pareto chart for March and November	95

## LIST OF TABLES

<b>Table</b>	<b>Title</b>	<b>Page</b>
Table 2.1	Evolution of Agile Manufacturing	12
Table 2.2	Comparison in the Quality Gurus	18
Table 2.3	The Dimensions of Quality	19
Table 2.4	Definition of OEE variables	22
Table 3.1	Corporate information	43
Table 3.2	Team members of the project	63
Table 3.3	Engineering technique or AM system used in the project	63
Table 4.1	OEE of the machines for March, April, May and June	80
Table 4.2	Monthly output, percentage of loss of material per hour, reworked material per month and MTBF for March, April, May and June	81
Table 4.3	OEE of the machines for July, August, September, October and November	87
Table 4.4	Monthly Output, percentage of loss of material per hour, reworked material per month and MTBF for July, August, September, October and November	87
Table 5.1	Data Screening for March and November	94
Table 5.2	Result validation	95

## LIST OF SYMBOLS AND ABBREVIATIONS

AM	Agile Manufacturing
ANOVA	Analysis Of Variance
ARPANET	Advanced Research Project Agency Network
BPR	Business Process Reengineering
CAD	Computer Aided Design
CAM	Computer Aided Manufacturing
CE	Concurrent Engineering
CEO	Chief Executive Officer
CFO	Chief Financial Officer
CIM	Computer Integrated Manufacturing
CPM	Critical Path Method
E-Ops	Electronic Operations
EOQ	Economic Order Quantity
FMS	Flexible Manufacturing System
GT	Group Technology
ISO	International Organization For Standardization
JIT	Just In Time
MRP	Manufacturing Resource Planning
MTBF	Mean Time Between Failure
OEE	Overall Equipment Effectiveness
PDCA	Plan-Do-Check-Act
PDSA	Plan-Do-Study-Act
PERT	Program Evaluation and Review Technique
POIC	Palm Oil Industrial Cluster
QFD	Quality Function Development
RE	Reverse Engineering
TPM	Total Productive Maintenance
TQC	Total Quality Control
TQM	Total Quality Management
U.S.	United State
WIP	Work In Process
