Acknowledgements

First and foremost, I would like to thank Allah the Almighty. Without His will, grace, and mercy nothing is possible in the whole universe.

This thesis would not have been possible without the help, support, and cooperation of a number of people.

I am extremely thankful to my supervisor, Associate Professor Dr. Rajeswary A. Sargunan, whose encouragement, supervision and support from the preliminary to the concluding level enabled me to develop an understanding of the subject.

I would also like to express special thanks to the international students of the faculties of Education and Computer Science and Information Technology and their respectful lecturers. Without their corporation I could not have gotten such relevant data.

Last but not least, my deepest gratitude and appreciation goes to the people who are the closest to my heart, my husband and my parents, whose love and support have encouraged me to move on during the course of my life and studies. I love you more than anything else in my life.
