

TABLE OF CONTENTS

	Page
ABSTRACT	ii, iii
ACKNOWLEDGEMENT	iv
LIST OF TABLES, SCHEMES AND FIGURES	viii
CHAPTER 1	
INTRODUCTION	1
1.1. Annonaceae	2
1.1.1. Origin and Distribution	3
1.1.2. General Characteristics and Morphology	4
1.1.3. Classification	5
1.1.4. Economic and Medicinal Importance	6
1.2. The Tribe: Mitrophoreae	10
1.3. The Genus: <i>Pseuduvaria</i>	10
1.3.1. <i>Pseuduvaria rugosa</i>	13
CHAPTER 2	
CHEMICAL CONTENTS OF ANNONACEOUS PLANTS	15
2.1. Alkaloids in general	16
2.1.1. Alkaloids of the Annonaceae	22
2.1.2. Alkaloids of <i>Pseuduvaria</i> species	24
2.2. The Isoquinoline Alkaloids	27

2.2.1.	Aporphine Alkaloid	29
2.2.2.	Oxoaporphines	37
2.2.3.	4,5-Dioxoaporphines	41
2.3.	General Spectral Features of Aporphine and Oxoaporphine	44
2.3.1.	Ultraviolet Spectroscopy	46
2.3.2.	Mass Spectroscopy	50
2.3.3.	¹ H-NMR	54
2.3.4.	¹³ C-NMR	59
2.3.5.	Optical Rotatory Dispersion and Specific Rotation	60

CHAPTER 3

RESULTS AND DISCUSSION	63	
3.1.	Alkaloid Extract of <i>Pseuduvaria rugosa</i>	63
3.1.1.	Structural Elucidation of Compound Labeled PR1	65
3.1.2.	Structural Elucidation of Compound Labeled PR2	69
3.1.3.	Structural Elucidation of Compound Labeled PR3	72
3.1.4.	Structural Elucidation of Compound Labeled PR4	76
3.1.5.	Structural Elucidation of Compound Labeled PR5	81
3.1.6.	Structural Elucidation of Compound Labeled PR6	85
3.1.7.	Structural Elucidation of Compound Labeled PR7	88
3.2.	Petroleum-ether Extract of <i>Pseuduvaria rugosa</i>	91
3.2.1.	Structural Elucidation of Compound Labeled PR8	91
3.2.2.	Structural Elucidation of Compound Labeled PR9	108

3.3. Conclusions	113
------------------	-----

CHAPTER 4

EXPERIMENTAL	117
4.1. Instrumentation	117
4.2. Reagents	119
4.3. Plant Materials	120
4.4. Extraction of Plant Material	121
4.5. Separation and Purification of the Alkaloids	122
4.5.1. Study of the crude CH ₂ Cl ₂ extract	122
4.5.2. Study of the crude Pet-ether extract	123
4.6. Physical and Spectral Data of the Isolated Compounds	125
REFERENCES	132

LIST OF TABLES, SCHEMES AND FIGURES.

Tables	Page
1. Genera of Annonaceae in the Malaya Forest	8
2. Comparative list of the genera and species of the Mitrophoreae in Ridley's and present revision.	12
3. Alkaloid compositions of some <i>Pseuduvaria</i> species reported in the literature.	26
4. Modern strategy for structure determination of alkaloids	45
5. The UV maximum absorption of aporphines.	47
6. Intensities of fragment ions in aporphine mass spectra.	52
7. ^{13}C -NMR and ^1H -NMR data for compound PR8	101
8. ^{13}C -NMR and ^1H -NMR data for compound PR9	110
9. Chromatography results from dichloromethane extract of <i>Pseuduvaria rugosa</i> .	124
10. HPLC's retention time of compounds PR4 and PR5.	124

Schemes

1. Classification of Annonaceae	7
2. General classification of alkaloids based on the concept of biogenesis.	18
3. General biogenetic pathway of isoquinoline alkaloids	28
4. The biogenetic pathway to C-9, C-10 or C-10, C-11	

disubstituted aporphines.	38
5. The biogenetic pathway to C-10 monosubstituted and unsubstituted ring-D aporphines.	39
6. The biogenetic pathway to C-9 and C-11 substituted aporphines.	40
7. The biogenetic pathway to oxoaporphines.	43
8. The fragmentation patterns for aporphines.	53
9. The fragmentation patterns for oxoaporphines.	55
10. The mass fragmentation patterns for compound PR1	68
11. The mass fragmentation patterns for compound PR2	71
12. The mass fragmentation patterns for compound PR3	75
13. The mass fragmentation patterns for compound PR4	79
14. The mass fragmentation patterns for compound PR6	87
15. The mass fragmentation patterns for compound PR7	90
16. The mass fragmentation patterns for compound PR8	100

Figures

1. Development and differentiation of mitriform corolla of the tribe Mitrophoreae	11
2. The picture of <i>Pseuduvaria rugosa</i>	14
3. Chemical names of alkaloid based on skeletal features	20
4. $^1\text{H-NMR}$ spectrum of compound PR4	80
5. $^1\text{H-NMR}$ spectrum of compound PR5	84

6.	Mass Spectrum of compound PR8	99
7.	¹ H-NMR spectrum of compound PR8	102
8.	¹³ C-NMR spectrum of compound PR8	103
9.	DEPT spectrum of compound PR8	104
10.	COSY spectrum of compound PR8	105
11.	HMQC spectrum of compound PR8	106
12.	HMBC spectrum of compound PR8	107
13.	¹ H-NMR spectrum of compound PR9	111
14.	¹³ C-NMR spectrum of compound PR9	112
