

## **ACKNOWLEDGEMENTS**

I would like to acknowledge many outstanding and dedicated people for helping me during my MBA studies.

I would especially like to thank Dr. Ahmad Zahiruddin Bin Yahya – my dissertation chair – whose help and guidance have been instrumental in this paper. His enthusiasm for research has encouraged me in my work.

Not the least, I also greatly appreciate his invaluable advice and thorough review of my dissertation draft.

I owe an enormous debt of thanks to my family, for their support, and patience over the last few years that can hardly be repaid.
