ACKNOWLEDGMENTS

It is almost impossible to acknowledge everyone who has been a part of this study and to give an appropriate amount of thanks to those who have helped in this journey. I have been fortunate enough to work with some of the best and most patient professors in the field of linguistics, and it is essential that I give thanks for their scholarly input and supervision on this project. First, to Associate Professor Dr. Jariah Mohd Jan: thank you for being my thesis supervisor, my mentor and for sharing your knowledge and experience of linguistics.

I would like to express my sincere gratitude to my wife Raheleh, who was also my companion, for being patient throughout my studies and for her continuous kind support.

Last but not least, thank you Allah for filling my spirit with enough impetus to undertake and continue this long academic journey. I know that I can accomplish anything when I look to the source of power. You are the reason I live and you have changed my life. I have felt your presence more in every moment of my life especially in the last three years of my studies for which I am forever grateful. Thank you for showing me your ever-increasing support all through my life.
