## ACKNOWLEDGEMENT

First and foremost, I would like to express my heartfelt thanks and gratitude to my supervisor, Prof. Dr. Lohanayahi Baskaran for her invaluable guidance during the course of this study. Her support, patience and kindness had given me the motivation and strength to complete this study.

Special thanks to my two dearest friends Inthera Davi and Madam Lee Siew Wan who have helped me in many ways during the course of this study.

My gratefulness to a good friend, Mr Cheah Ah Pull, for the help and support he has given me throughout the course of this study.

My deepest appreciation to my school headmaster, Mr Peh Hun Kee of SJK(C) Tampoi, the senior assistants and teachers of this school for their undue cooperation and support.

My deepest appreciation and thanks to my mother, brother and sister, my uncles and aunts who have helped me in various ways throughout the course of this study.

And above all, I would like to remember my late father, Mr Matthew Khit Quah Cheok Seng, who had been a pillar of strength to me throughout the course of this program. His constant encouragement and love will always be cherished and remembered.

And for those whom I have not mentioned but have helped me in one way or another, I would like to extend my thanks to all of you.
