The Gender Perspective of attitudes and Beliefs on Information Technology in Malaysian Army

Chen Boon Chuan

Master Degree of Management
Faculty of Business and Accountancy
University of Malaya, 2008

Submitted to the Graduate School of Business Faculty of Business and Accountancy University of Malaya, in Partial Fulfilment of the Requirement for the Master of Management Serial 12, 2008/2009

November 2009
ACKNOWLEDGEMENTS

This research effort represents a culmination of advice and great support of many people to whom I am deeply grateful. I wish to express my utmost appreciation and deepest to the following individuals:

To Mr Lee Sai Leong, the source of my wisdom, strength and inspiration. He is a sincere and extremely caring educator who has always encouraged me to be original and thorough in my investigations and research efforts. He has always sought time to bring out the best in me and taught me what it takes to be a good researcher. His constant constructive ideas and criticisms as well as invaluable advice throughout this study provided me with the right direction and motivation to successfully complete this study.

To Commandant of Malaysian Army Institute Communication and Electronic, Commanding Officer of 3 Royal Signal Regiment, 91 Royal Signal Regiment and 95 Royal Signal Regiment; who graciously allowed me to use their students and soldiers as participants in this study. They showed concern and extended their help during data collection.

Last but not least, to my family for their prayers, inspiration and support.

## CHAPTER 1: INTRODUCTION

1.1 Background of Study                                               1
1.2 Purpose of Study                                                  4
1.3 Malaysia Army Royal Signal Regiment (RSR)                          7
   1.3.1 Overview                                                     7
   1.3.2 Signaler                                                     9
1.4 Research Objective                                               10
1.5 Concept Development                                              10
1.6 Research Questions                                               12
1.7 Significance of Study                                            13
   1.7.1 Contribution to Knowledge                                   13
   1.7.2 Contribution to Practice                                    14
1.8 Organization of Study                                           14

## CHAPTER 2: LITERATURE REVIEW

2.1 Concept and Variables                                           16
2.2 Status of Characteristics                                       17
2.3 Theory Perspective                                              17
2.4 Issues of Gender Gap                                            18
2.5 Experience                                                      23
2.6 Age and Socioeconomic                                           26
2.7 Comfort Level                                                    28
2.8 Definition
2.8.1 Information Technology
2.8.2 Attitude
   2.8.2.1 Attitude and Consistency
   2.8.2.2 Attitude Survey
2.8.3 Belief

CHAPTER 3: RESEARCH METHODOLOGY
3.1 Methodological Issues and a Selecting Methodologies
3.2 Hypothesis Development
   3.2.1 Dependent Variable
   3.2.2 Independent Variable
   3.2.3 Hypothesis Testing
3.3 Selecting of Measure
   3.3.1 Rating Scale and Ranking Scale
   3.3.2 Reliability and Validity Issues
3.4 Data Collection
   3.4.1 Types and Sources of Data
      3.4.1.1 Secondary Data
      3.4.1.2 Primary Data
   3.4.2 The Preferred Method
   3.4.3 Questionnaire Design
3.5 Sampling Design
   3.5.1 Sample Survey
   3.5.2 Sampling
   3.5.3 Sampling Technique
   3.5.4 Determining the Sample Size
   3.5.5 Sampling Process
3.6 Data Analysis Techniques
   3.6.1 Objectives of Data Analysis
   3.6.2 Feel for the Data
CHAPTER 4: RESULT AND FINDING

4.1 Preliminary Analysis 58
  4.1.1 Data Screening 59

4.2 Demographic Data
  4.2.1 Gender 59
  4.2.2 Rank Structures 61
  4.2.3 Expertise 61
  4.2.4 Age 61
  4.2.5 Working Experience 61
  4.2.6 Education Background 62
  4.2.7 Ethnic 62

4.3 Respondents IT Background
  4.3.1 Personal Computer 62
  4.3.2 Having Attended Computer Course before Joining MAF 62
  4.3.3 Email Account 63
  4.3.4 Browse the Internet 63
  4.3.5 Computer Important Level at Work Place 64

4.4 Factor Analysis on the Attitude of Respondents toward IT 64

4.5 Reliability Test of the Data
  4.5.1 Group Factor 1 67
  4.5.2 Group Factor 2 68
  4.5.3 Group Factor 3 69

4.6 Hypothesis Testing on Gender Perspective Attitude toward IT 70
  4.6.1 $H_1A$: There is significant difference in the perception between males and females regarding the value of IT in making users more productive.
4.6.2 H2A: There is significant difference in the attitudes between males and females signaler toward the impact of IT on people and their work environments.

4.6.3 H3A: There is significant difference between males and females signaler comfort in using computers

4.7 Hypothesis Testing between other Demographic Factors and Attitude toward IT

4.7.1 H4A: Other demographic factors significantly influence the perception regarding the value of IT in making users more productive.

4.7.2 H5A: Other demographic factors significantly influence the attitudes toward the impact of IT on people and their work environments.

4.7.3 H6A: Other demographic factors significantly influence comfort in using computers.

4.8 Hypothesis Testing between Respondent IT Background and Attitude toward IT

4.8.1 H7A: Respondent IT backgrounds significantly influence the perception regarding the value of IT in making users more productive.

4.8.2 H8A: Respondent IT backgrounds significantly influence the attitudes toward the impact of IT on people and their work environments.

4.8.3 H9A: Respondent IT backgrounds significantly influence comfort in using computers.

4.9 Gender Different Belief and Attitude toward IT

4.10 Summary of the Finding

CHAPTER 5: CONCLUSION AND RECOMMENDATION

5.1 Research Overview

5.2 Summary of Research Result

5.3 Implication of Study

5.4 Limitation and Suggestions for Future Research
