

**SYNTHESIS OF CHROMIUM(III) CARBOXYLATE COMPLEXES
AND THEIR USE IN ZIEGLER-NATTA POLYMERIZATION**

BY

MOUGANG DJANTENG SOUME BERLINE BEATRICE

**IN FULFILMENT OF THE REQUIREMENTS FOR THE
DEGREE OF MASTER OF SCIENCE
ORGANOMETALLIC SYNTHESIS and POLYMER CHEMISTRY**

**DEPARTMENT OF CHEMISTRY, FACULTY OF SCIENCE
UNIVERSITY OF MALAYA
KUALA LUMPUR, MALAYSIA**

OCTOBER 2009

DEDICATION

This dissertation is dedicated to

my children

Soume Carat Serena and Soume Sean Eben

whose arrival gave me
motivation and determination in life

I am fortunate to have them

and

my husband

Soume Manasse

whose love, support and patience

helped me complete this work

ACKNOWLEDGMENTS

I would like to thank my supervisors, Prof. Dr. Rosiyah Yahya and Prof. Dr. Gan Seng Neon for their important contributions, suggestions, guidance and encouragement, and for providing me the opportunity to work on an interesting research project. Working with them has been a wonderful, life-changing and rewarding experience I will never forget.

I extend my deepest thanks and appreciation to Prof. Ward T. Robinson, who gave me the opportunity to learn his approach to single crystal X-ray structure determination, and the value of pursuing important questions, not just interesting ones. Watching him, work with methodical rigor and unwavering integrity has been inspirational. His guidance throughout the writing of this dissertation was invaluable. In addition, he also provided me with kind and encouraging words when I experienced the “research blues”. But most of all, I respect him for his humbleness despite all his accomplishments.

I would also like to thank Assoc. Prof. Dr. Richard Wong Chee Seng for helping to train me in dry box technique, and to solve the overheating problem I experienced with polymerization reactions at the beginning of my research. I would like to thank Assoc. Prof. Dr. Noel F. Thomas for his suggestions throughout the writing of my dissertation. My appreciation also goes to Prof. Dr. Ng Seik Weng, for co-editing and publishing my Acta crystallographica section “E” article. Thank you to Mr. Bakri b. Din of the department of chemistry (UKM, Malaysia) for carried out CHN&S elemental analyses.

I would like to express my sincere gratitude to the University of Malaya for financial support through the University of Malaya Fellowship Scheme Award (2007 –

2009), PPP grant N° PS078-2007C and PPP grant N° PS208-2008A. Thank you to the department of chemistry for the facilities made available to me for carrying out this research and to the Head of department for her support. My thanks are also due to the staff, friends and colleagues of the polymer and material science laboratory, especially Mr. Zulkiflee Hassan and Ms. Ho Wei Leng for their warm friendship and technical assistance; to Siti Murni for sending samples for the elemental analysis; to Masmira, Asfarina and Ayu for training me to use the dynamic mechanical analysis instrument. Thanks are also dedicated to Mr. Hashim Harun for help with glasswares, to Mr. Azizul Isha and Ms. Norzalida Zakaria for their assistance in running NMR spectroscopy and to Mr. Mohamed for his assistance in running magnetic susceptibility measurement.

I wish to thank my good friends, Mohammadreza Asgari, PhD student in the faculty of business, University of Malaya, Chérubin Noumissing Sao, PhD student in the Institute of Chemistry, Kassel University, Germany and Alain Bruno Fadjie, PhD student in the Physics department, University of Rennes1, France; who advise, encourage me and share their postgraduate experience with me.

Finally, but most importantly, my warmest thanks go to my family and extended family, more precisely, my parents and siblings, for their continuous love, encouragement and support during this work. I would like to thank the Nzegang family members for their love and support during my teenage age. A special Thank goes to the Botchemie family members for taking care of my kids during my studies. My deepest thanks go to my children who inspired me. Last but not least, to my husband, without whom this work would have never reached completion.

UNIVERSITI MALAYA

ORIGINAL LITERARY WORK DECLARATION

Name of Candidate: **MOUGANG DJANTENG SOUME BERLINE BÉATRICE**

I.C/Passport No: **775323**

Registration/Matric No: **SGR070038**

Name of Degree: **Master of Science**

Title of Project Paper/Research Report/Dissertation/Thesis (“this Work”):

SYNTHESIS OF CHROMIUM(III) CARBOXYLATE COMPLEXES AND THEIR USE IN ZIEGLER-NATTA POLYMERIZATION

Field of Study: **ORGANOMETALLIC SYNTHESIS and POLYMER CHEMISTRY**

I do solemnly and sincerely declare that:

- (1) I am the sole author/writer of this Work;
- (2) This Work is original;
- (3) Any use of any work in which copyright exists was done by way of fair dealing and for permitted purposes and any excerpt or extract from, or reference to or reproduction of any copyright work has been disclosed expressly and sufficiently and the title of the Work and its authorship have been acknowledged in this Work;
- (4) I do not have any actual knowledge nor do I ought reasonably to know that the making of this work constitutes an infringement of any copyright work;
- (5) I hereby assign all and every rights in the copyright to this Work to the University of Malaya (“UM”), who henceforth shall be owner of the copyright in this Work and that any reproduction or use in any form or by any means whatsoever is prohibited without the written consent of UM having been first had and obtained;
- (6) I am fully aware that if in the course of making this Work I have infringed any copyright whether intentionally or otherwise, I may be subject to legal action or any other action as may be determined by UM.
