

## ACKNOWLEDGEMENT

First and foremost, all praises and thanks are due to Aruthperumjothi (God), the Guiding Light in this long journey, who abundantly supported me with health, strength, knowledge and the will to complete this work.

Very special thanks and sincere appreciation to my admirable supervisor, Dr Mohana Kumari Nambiar for her steadfast guidance and support in ensuring the completion of this study. Without her I could not have ended this long journey.

I am also deeply indebted to all the lecturers who taught me in the MESL programme from all of whom I have learnt so much. Special thanks is also due to Dr Elaine Morais and Dr Ng Kwei Kuen for their encouragement and for having taught me to think out of the box.

I also wish to thank the Principal, Pn Nabsiah Binti Bakar who gave me full permission to conduct the study in the school. Additional thanks go to the students who actively participated in this study and willingly shared their experiences with me. I appreciate the help from Cik Halijah Haroon, with the SPSS.

I extend my gratitude and affection to my parents and sisters for their inspiration, love and encouragement throughout the difficult times. My deep gratitude goes to the innumerable people, both family and friends, who wished well for me to complete this work.

Last but not least, I extend my gratitude and affection to my husband and daughter for their unrelenting faith in me, for their patience, prayers and motivation to complete this work.

I also wish to thank each and everyone who has contributed in one way or another to make this study a success.
