LIST OF FIGURES x

ABRIVIATION AND SYMBOLES xii

ABSTRACT ii

ABSTRAK iii

1.0 INTRODUCTION

1.1 History of antimicrobial resistance 1

1.2 The need for development of novel anti-MRSA agents 2

1.3 The therapeutic value of medicinal plants in drug discovery 5

1.4 Tinosprora crispa L 7

1.4.1 Traditional use of Tinosprora crispa 8

1.4.2 Previous study on Tinospora crispa 8

1.4.3 Chemical components isolated from Tinosprora crispa 9

1.5 Antimicrobial susceptibility test methods

1.5.1 Disc diffusion test 10
1.5.2 Dilution methods: Broth dilution

1.6 Acute oral toxicity testing

1.7 Objective of the study

2.0 MATERIALS AND METHODOLOGY

2.1 Plant material and extract preparation

2.1.1 Aqueous extract preparation

2.1.2 Ethanol extracts preparation

2.1.3 Sterility Proofing of the Extracts

2.2 Identification of Bacterial strains

2.3 Antimicrobial susceptibility testing

2.3.1 Disc diffusion test

2.3.2 Preparation of impregnated discs

2.3.3 Inoculums and inoculation procedure

2.3.4 Application of impregnated discs

2.3.5 Minimum Inhibitory Concentration (MIC)

2.3.6 Preparation of extract dilutions

2.3.7 Inoculation procedure

2.3.8 Determination of MIC values

2.4 Antibacterial effects of several plant solvents
2.5 Acute toxicity study

2.5.1 Acute oral toxicity study

2.5.1.1 Mortality and behavioural observation

2.5.1.2 Body weight analysis

2.5.1.3 Liver and renal function analysis

2.5.1.4 Gross necropsy

2.5.1.5 Histological examination

3.6 Statistical analysis

3.0 RESULTS

3.1 Bacteriological characteristic study

3.2 Antimicrobial susceptibility testing

3.2.1 Disc diffusion method

3.2.2 Minimum Inhibitory Concentration (MIC)

3.3 Antibacterial effects of several plant solvents

3.4 Acute toxicity study

3.4.1 Mortality and behavioural changes

3.4.2 Analysis of body weight

3.4.3 Liver and renal function analysis
3.4.4 Gross necropsy and histology

4.0 DISCUSSION

4.1 Experimental findings

4.1.1 Antimicrobial Susceptibility Test Method

4.1.2 Acute toxicity study

4.2 Limitation of the study

4.3 Future study

5.0 CONCLUSION

6.0 REFERENCES

7.0 APPENDICES

APPENDICES A: Gram staining protocol

APPENDICES B: Histology protocol

APPENDICES C: Data tables
