Faculty of Business and Accountancy, University of Malaya,
in partial fulfillment of the requirements for
the Degree of Master of Business Administration
July 2012
ACKNOWLEDGEMENT

My humblest gratitude and thankfulness to the Almighty Allah s.w.t., the most merciful and gracious, for enabling me to complete this research project.

I would like to take this opportunity to express my sincere thanks and gratitude to my project supervisor, Professor Madya Dr. Choong Kwai Fatt, for his faith, encouragement, and professional advice in guiding me through my project paper despite his busy schedule.

Special thanks to my beloved son, Muhammad Faris Hidayat, for the love, patience, understanding, and support in inspiring me to persevere in realizing this dream. May you share my passion in creating rainbow.

Finally, thanks to all fellow students, lecturers and staff from the Graduate School of Business, University of Malaya for the wonderful assistance and making the journey of acquiring an MBA a memorable learning experience.

HALISAH ASHARI

JULY 2012
ABSTRACT

Today’s challenging business environment has created a complex and dynamic landscape forcing Government-linked Companies (GLCs) in Malaysia to manage their workforce in a global context competitively. Attracting, recruiting, engaging, deploying, developing and retaining the right leadership and high performers are becoming excruciatingly demanding as human capital shortfalls expand and the workforce increases in agility. Talent solutions have emerged as the nucleus means for business vitality to retain key performance individuals to meet and exceed current as well as future business strategies and goals to sustain organizational performance.

The realization that talent shortages are increasingly becoming one of the biggest human capital concerns for organizations has prompted the war for talent. Integrated strategy-driven talent solutions that are championed by talent decisions have been recognized as an essential business strategy that drive the retention of highly talented key performance individuals and consequently reduces business risks leading the way to organizational resiliency and performance for organizations in today’s challenging and competitive business environment.

This paper examined talent solutions at selected GLCs in Malaysia. The objectives of this paper were to better understand the challenges and importance of talents solutions in retaining key performance individuals and sustaining organizational performance in GLCs in Malaysia and to present practical case on talent retention efforts, the significant roles of talent decisions in championing talent solutions and the moderating roles of talent architecture itself in achieving and sustaining talent results.
A questionnaire survey was conducted on 14 case-study GLCs selected from four different intensive industries namely social, infrastructure, economy, and technology. The findings of the study revealed that talent solutions were the key success factor to the retention of key performance individuals and organizational performance sustainability in GLCs. As expected, there was a significant relationship between talent decisions, talent architecture, and retention of key performance individuals and organizational performance.
# TABLE OF CONTENTS

Acknowledgement ............................................................................................................. i
Abstract ................................................................................................................................. ii
Table of Contents ..................................................................................................................... iv
List of Tables ........................................................................................................................... vi
List of Figures ......................................................................................................................... viii
Appendixes .................................................................................................................................. ix

Chapter One: Introduction

1.1 Introduction ...................................................................................................................... 1
1.2 Problem Statement .......................................................................................................... 3
1.3 Purpose and Significance of the Study ........................................................................... 5
1.4 Research Questions / Objectives of the Study ................................................................. 7
1.5 Scope of the Study .......................................................................................................... 8

Chapter Two: Literature Review

2.1 Introduction ...................................................................................................................... 9
2.2 Concept of Talent Management ..................................................................................... 10
2.3 Roles of Human Resource Management in Talent Solutions Strategy ......................... 13
2.4 Retention of Key Performance Individuals a Result of Talent Solutions ....................... 15
2.5 Organizational Performance a Result of Talent Solutions ............................................. 17

Chapter Three: Research Methodology

3.1 Research Framework ...................................................................................................... 19
3.2 Development of Hypotheses .......................................................................................... 21
3.3 Selection of Measures .................................................................................................... 22
3.4 Sampling Design ........................................................................................................... 24
3.5 Data Collection Procedures ........................................................................................................ 25

3.6 Data Analysis Techniques ........................................................................................................ 29

Chapter Four: Research Results

4.1 Demographics Information ........................................................................................................ 31

4.2 Descriptive Statistics ................................................................................................................ 33

4.3 Normality Tests ........................................................................................................................ 37

4.4 Reliability Tests ........................................................................................................................ 38

4.5 Correlation ................................................................................................................................ 44

4.6 Multiple Regression .................................................................................................................... 46

4.7 Factor Analysis .......................................................................................................................... 49

4.8 Independent Sample T-Test ........................................................................................................ 53

4.9 One way Analysis of Variance (ANOVA) .................................................................................. 57

4.10 Testing of Hypotheses .............................................................................................................. 62

4.11 Summary of Research Results .................................................................................................. 63

4.12 Discussion of Research Results ............................................................................................... 70

Chapter Five: Conclusion and Recommendation

5.1 Summary and Conclusion .......................................................................................................... 76

5.2 Limitations of the Study ............................................................................................................. 80

5.3 Suggestion for Future Research ............................................................................................... 81

5.4 Implications of the Study .......................................................................................................... 82
