ABSTRACT

Recently, adoption of the Clarified International Standard of Auditing (Clarified ISAs) and International Standard of Quality Control (ISQC) have gain steady attention from various accounting practitioners and academicians. This Clarity project began in 2004 and was completed in February 2009. After 2 years of adoption of Clarified ISAs and ISQC, it is time for the practitioners to provide the feedback to the International Auditing and Assurance Standard Board (IAASB) on post implementation review of Clarified ISAs and ISQC. The study seeks to survey the internal resource preparedness of the Small and Medium Practice (SMP) for adoption of Clarified ISAs and ISQC by applying resource-based view theory. Further, impact of Clarified ISAs and ISQC on timeliness on audit report had been investigated. Standard multiple regression was used to analyse data from 115 respondents from Small and Medium Practice (SMP) in Malaysia. Based on the result of analysis, the study evidenced that the organizational resources and intellectual resources preparedness lead to the adoption of Clarified ISAs and ISQC among SMP in Malaysia. Besides, the adoption of Clarified ISAs and ISQC also affects the timeliness of audit report. Nevertheless, there are no significant association found between financial resource preparedness, human resource preparedness and the adoption of clarified ISAs and ISQC. Findings from the study have implications for academicians, regulatory bodies, auditing standard setters, professional accounting bodies, audit firms and auditees toward the adoption of Clarified ISAs and ISQC.

ACKNOWLEDGEMENT

I would like to acknowledge the assistance, support and encouragement from everyone who have assisted me to complete the research project. Without the guidance and assistance, the research project would not have been possible.

First and foremost, i would like to express my sincere gratitude to my supervisor, Dr Nurmazilah Mahzan for her endless support and guidance throughout the whole progress of the research project. Without her guidance, this research project would not be possibly done successfully.

In addition, I would like to thank all lecturers in Graduate Business School University Malaya throughout the 2 years study in MBA University Malaya. I believe the knowledge gained throughout the MBA is beneficial to me in the future. Besides, I would like to thank for Malaysian Institute Certified Public Accountant (MICPA) for the financial grant to support this research and participants from all small and medium practice in Malaysia for their valuable time in responding the survey.

Last but not least, loving appreciation is also dedicated to my family for their invaluable support, with necessary mention to my father, Mr Ang Kong Kiat, my mother, Mrs Lim Lee Eng, my sibling, Ang Soon Gin, Ang Sok Yee and Ang Sok

Ting. My sincere thanks to all my friends especially Phang Soon Yeow and Arison Ho Sel Chuan for their guidance and moral support throughout the studies
