

ACKNOWLEDGEMENT

This thesis would not have come about without the help of many wonderful persons whom I would like to thank especially to my supervisor **Prof. Dr. Mhd Radzi Abas** from University of Malaya and Mr Ng Hock Sing from Department of Chemistry (DOC) for guiding me throughout this project with their helpful discussion and advices.

Also I would like to thank to my sponsorship, Public Service Department of Malaysia (PSD) and to my department, DOC for allowing me to use the facilities to perform this project and for those who taught me, kept an eye on the progress of my work and who were always available when I needed their help and advice. I would like also to express my sincere thanks to colleagues and my friends. Their comments and suggestions added both quality and clarity to the writing.

Last but not least, a special thanks to my beloved husband, **Mohd Amir Husna bin Nik Alli@Zulkifli**, my kids and all my family members for their unwavering support throughout this project.

THANK YOU.

CONTENTS

Original Literary Work Declaration (English)	
Abstract	
Acknowledgement	i
Contents	ii-iii
List of tables	iii
List of figures	iii
1.0 Introduction	1-3
2.0 Literature Review	
2.1 Sildenafil, Vardenafil, Tadalafil and their analogues	4-6
2.2 Liquid Chromatography Tandem Mass Spectrometer (LC-MS/MS)	6-7
3.0 Methodology	
3.1 Instruments and Reagents	8-9
3.2 Liquid Chromatography with Tandem Mass Spectrometry Detector	9-10
3.3 The Methods	
3.3.1 Parameters for Liquid Chromatography Tandem Mass Spectrometry	10-11
3.3.2 Sample Preparation	13-14
4.0 Results and Discussion	
4.1 Chromatography Separation	20-21
4.2 Sample Preparation	23
4.3 Validation	
4.3.1 Linear Range and Working Range	24
4.3.2 Limit of Detection and Limit of Quantification	25-26

4.3.3	Repeatability and Reproducibility	29-30
4.3.4	Selectivity	31
4.3.5	Measurement Uncertainty	31
4.3.6	Screening Sample	32
5.0	Conclusion	34-35
6.0	References	36-37

LIST OF TABLES:

		Page
Table 1	MRM conditions for 23 analytes	16-19
Table 2	LoD, LoQ and recovery study in matrix coffee, herbal products and candy in ng/mL level.	27-28
Table 3	RSD of repetability test in matrix coffee, herbal products and candy in ng/mL level	29-30

LIST OF FIGURES:

		Page
Figure 1	Molecule structure of Tadalafil and its analogue, Aminotadalafil	6
Figure 2	MS Spectrum for Tadalafil	12
Figure 3	MSMS Spectrum for Tadalafil	13
Figure 4	Homogenized sample	14
Figure 5	Filtering Sample	15
Figure 6	Total Ion Chromatogram (TIC) for 23 analytes	22

		Page
Figure 7	The calibration graph of N-Desmethylsildenafil	24
Figure 8	Linearity study for Homosildenafil	25
Figure 9	Chromatogram of Positive Sample	33

LIST OF APPENDIXES:

Figure A.1	Liquid Chromatograph Tandem Mass Spectrometer (LC-MS/MS)
Figure A.2	Balance
Figure A.3	Centrifuge
Figure A.4	Solvent Dispenser
Figure B.1	Validation Study in Candy Matrix
Figure B.2	Validation Study in Herbal Matrix
Figure B.3	Validation Study in Coffee Matrix
Figure B.4	Validation Study in Coffee Matrix-Piperiacetildenafil
Figure C.1	Measurement Uncertainty-Recovery of Hydroxythiohomosildenafil
Figure C.2	Measurement Uncertainty-Sample Effect of Hydroxythiohomosildenafil
Figure C.3	Measurement Uncertainty-Precision of Hydroxythiohomosildenafil
Figure D.1	Positive Samples
