

ACKNOWLEDGEMENTS

First and foremost, I would like to express my deepest gratitude to my supervisor, Prof. Dr. Muhamad Bin Zakaria for his valuable advice, assistance, guidance, and patience throughout the course of this research.

I also would like to thanks to all those who are always there to lend a hand to me especially all my lab mates and Biohealth Science staff of Institute of Biological Sciences for their contribution. Without them this research will not be able run smoothly. Special thanks to my wife Heida Nadia Bte Zulkefli for always give the support and encouragement.

Last but not least, i would like to thanks to my beloved family for help and support throughout this research.
