

LIST OF APPENDICES

I	Capital Cost of Landfill B	115
II	Operating Cost Estimation in Landfill B (on First Year-12 Months Basis)	116
III	Estimation of Closure Cost of Landfill B	117
IV	Structure of Closure Capping in Landfill B	118

LIST OF FIGURES

2.1	Functions and Interrelations of Elements in Solid Waste Management	29
2.2	Hierarchy of Waste Management	30
2.3	Phases of MSW Degradation in a Typical Landfill	34
2.4	Landfill Operations and Processes	41
2.5	The Flow Chat from Ecosystems to Economic Values	47
2.6	Total Economic Value and Its Components	48
3.1	A Schematic Structure of Anaerobic Landfill	52
3.2	A Schematic Structure of Semi-aerobic Landfill	52
3.3	A Schematic Structure of Aerobic Landfill	52
3.4	The Mechanism of Fukuoka Method Semi-aerobic Landfill	54
3.5	Outline of Aerobic and Anaerobic Decomposition	61
4.1	Materials Balance Model	66
4.2	The Framework of This Study	70
5.1	Components of Capital Costs in Landfill A	75
5.2	Components of Operating Costs in Landfill A	76
5.3	Components of Closure Costs in Landfill A	76
5.4	Economical Efficiency of Sanitary Landfill A	78
5.5	Examples of Costs and Benefits Considerations in Landfill	86

5.6	Components of Capital Costs in Landfill B	89
5.7	Components of Capital Costs of Landfill B (Annual Average)	89
5.8	Components of Closure Costs of Landfill B (Annual Average)	90
5.9	Components of Average Economic Benefits Annually in Landfill B	92
5.10	Graph Depicting Economic Efficiency of Sanitary Landfill B	94

LIST OF PLATES

5.1	The Overview of Landfill B (1)	80
5.2	The Overview of Landfill B (2)	80
5.3	Leachate Treatment Plant	83
5.4	Leachate Retention Pond	83
5.5	Daily Cover	85
5.6	Construction Stage	87
5.7	Operation Period	87

LIST OF TABLES

1.1	Waste Composition of Various Countries (Percentage by Weight)	2
1.2	Information on GDP and Waste Quantity for Some Asian Regions	3
1.3	Solid Waste Generation in Peninsular Malaysia by States (Metric Tonnes)	6
1.4	Methods of Waste Disposal Development in Malaysia	11
2.1	General Composition of Waste in Malaysia	23
2.2	Advantages and Disadvantages of Different Types of Landfill	33
2.3	USEPA Classification of Sanitary Landfill	40
2.4	A Summary of the General Characteristics of Waste Disposal Facilities	43
2.5	Variable Affecting the Five Elements of Environmental-landfill Indexes	46
3.1	Comparison among Semi-aerobic Method and Other Conventional Method	53
3.2	General Stages of FM Landfill	57
5.1	Projection of Total Waste Disposed at Landfill A	74
5.2	Economical and Environmental Cost and Benefit of Landfill A	77

5.3	Estimation of Waste Disposal to Landfill B	81
5.4	Cost of Cleanup versus Environmental Revenue	91
5.5	Summary of the Quantifiable and Non-Quantifiable Economic, Social and Environmental Gains and Losses	93
5.6	Demonstrating Landfill A Cost and Environmental Benefit	94
5.7	Technical Considerations of Landfill A and Landfill B	97
5.9	Financial Considerations of Landfill A and Landfill B	98

LIST OF SYMBOLS AND ABBREVIATIONS

MSW	Municipal Solid Waste
GDP	Gross Domestic Product
VOA	Volatile Organic Acids
COD	Chemical Oxygen Demand
SWM	Solid Waste Management
ISWM	Integrated Solid Waste Management
MHLG	Ministry of Housing and Local Government
PCMC	Public Cleansing Management Corporation
MOH	Ministry of Health
WHB	Worldwide Holdings Berhad
IWMS	Integrated Waste Management System
IWM	Integrated Waste Management
DOE	Department of Environment
EIA	Environmental Impact Assessment
DEIA	Detailed Environmental Impact Assessment
RM	Ringgit Malaysia
°C	Degree Celsius
%	Percentage
m	Meter
m ²	Meter Squared
m ³	Meter Cubic

m^3/day	Meter Cubic Per Day
m^3/yr	Meter Cubic Per Year
L	Litre
kg	Kilogram
kg/m^3	Kilogram Per Meter Cubic
kg/day	Kilogram Per Day
g	Gram
