

## List of Tables

Table 1 : Melting point and colours of the ligands and metal complexes.	24
Table 2 : Percentage of elemental compositions in ligands and complexes.	25
Table 3 : Characteristic IR bands of L1, L2, L3 and their complexes.	26
Table 4 : Chemical shifts, (ppm) in $^1\text{H}$ NMR spectra.	29
Table 5 : Chemical shifts, (ppm) in $^{13}\text{C}$ NMR spectra.	30
Table 6 : The wavelength of UV-Vis for the ligands and complexes.	31
Table 7 : Effective magnetic moment of copper(II) and nickel(II) complexes.	36
Table 8 : Physical observation for abnormalities or mortalities after administration of test compounds.	47
Table 9 : Gross gastric lesions and percentage of inhibition by indole derivatives in ethanol-induced gastric ulcer.	52
Table 10: Average blood glucose levels before and after injection of glucose subcutaneously.	63
Table 11: Percentage of change in blood glucose level in mice.	64
Table 12: Pascal's constants for calculating diamagnetism.	78
Table 13: Crystallographic data for L1	79
Table 14: Selected bond lengths ( $\text{\AA}$ ) and angles ( $^\circ$ ) for L1.	80

Table 15: Crystallographic data for L2.	81
Table 16: Selected bond lengths (Å) and angles (°) for L2.	82
Table 17: Crystallographic data for L3.	83
Table 18: Selected bond lengths (Å) and angles (°) for L3.	84
Table 19: Crystallographic data for NiL1	85
Table 20: Selected bond lengths (Å) and angles (°) for NiL1.	86
Table 21: Crystallographic data for NiL2.	87
Table 22: Selected bond lengths (Å) and angles (°) for NiL2.	88
Table 23: Crystallographic data for NiL3.	89
Table 24: Selected bond lengths (Å) and angles (°) for NiL3.	90
