

## Acknowledgement

First of all, a very deep thankful to Allah S.W.T. that helped me to manage myself to handle this project satisfactorily. I am pleased to acknowledge the supervision of my supervisor, Prof. Dr. Hapipah Mohd. Ali (Department of Chemistry) and co-supervisor, Assoc. Prof. Dr. Mahmood Ameen Abdulla (Department of Molecular Medicine) for their ideas and very helpful support in syntheses, characterization, anti-ulcerogenic activity and acute toxicity study. Prof. Dr. Mohd. Rais Mustafa (Department of Pharmacology) and Miss Haslyna Omar had also been very kind to guide me in the study of anti-diabetic activity. Many thanks to Assoc. Prof. Dr. Habsah Abdul Kadir (Institute of Biological Sciences ó Biochemistry) and her student, Daniel Wong Zin Hua for the neuroprotective screening assay. Prof. Dr. Ward Robinson from University of Canterbury, Christchurch, New Zealand helped in X-ray crystallography data collection while Prof. Dr. Ng Seik Weng (Department of Chemistry) solved the crystal structures. I would also like to acknowledge the Malaysia Ministry of Science, Technology and Innovation (MOSTI) for their research grants (ScienceFund 12-02-03-2031 and 12-02-03-2051) and National Science Fellowship (NSF) that financially support my Masters Degree, Malaysia Ministry of Higher Education (MOHE) for FRGS FP064/2006A and University of Malaya for PPP PS214/2008A. Besides, I am thankful to my colleagues and parents whom were truly understanding, supportive and always encouraged me to have patience and hard work as well as to those who contributed directly and indirectly in bringing the project to completion.
