Abstract	II
Table of content	III
List of tables	IX
List of figures	XIII
List of abbreviations	XV

CHAPTER ONE: ORGANOTIN COMPOUNDS

1.1	Introduction	2
1.2	PVC stabilizer	3
1.2.1	Mechanism of organotin compounds as thermal stabilizers	4
1.3	Organotin compounds as biocides	6
1.3.1	Organotin compounds as fungicides	7
1.3.2	Wood preservation	8
1.3.3	Antifouling paints	8
1.3.3.1	Free Association Paint	9
1.3.3.2	Self polishing copolymer	9
1.4	Medical uses and biological activity of organotin compounds	10
1.5	Other applications of organotin compounds	12
1.5.1	Catalyst in polymer industries	12
1.5.2	Glass treatment	13
1.6	Pollution and toxicity of organotin compounds	13
1.6.1	Water pollution	14
1.7	Physical and chemical properties of organotin compounds	16
1.8	Degradation of organotin compounds	18
		III

1.8.1	Biodegradation	20
1.8.2	Chemical cleavage	20
1.9	Analysis of organotin compounds	21
1.9.1	Extraction	22
1.9.2	Derivatization	22
1.9.2.1	Alkylation by Grignard reagent	22
1.9.2.2	Hydride generation by NaBH ₄	23
1.9.2.3	Ethylation by sodium tetra Ethyl Borate	23

CHAPTER TWO: PREPARATION OF ORGANOTIN COMPOUNDS

2.1	Main methods of synthesis	25
2.1.1	Grignard reaction	25
2.1.2	Wurtz reaction	25
2.1.3	Organoaluminum method	26
2.1.4	Direct synthesis	26
2.1.5	Rochow method	26
2.1.6	Sisido reaction	26
2.1.7	Redistribution reaction (Kocheskov Reaction)	27
2.2	Organotin carboxylate	27
2.3	Spectroscopic investigation of organotin compounds	29
2.3.1	¹¹⁹ Sn NMR spectroscopy	29
2.3.2	Infrared spectroscopy	32
	<i>Sn-C stretching frequencies</i>	32
	<i>Sn-Halogen stretching frequencies</i>	33
	<i>Sn-N stretching frequencies</i>	33
	<i>Sn-O stretching frequencies</i>	33
2.3.3	Sn Mossbauer spectroscopy	41

CHAPTER THREE: NANOMATERIALS AND ENVIRONMENT

3.1	History	46
3.2	Nanotechnology and environment	47
3.2.1	Energy	48
3.2.2	Water	50
3.2.3	Remediation/ treatment	51
3.3.	Semiconductors	52
3.3.1	Some Application of semiconductors	55
3.4	Application of nano titanium oxide in environment	56
3.4.1	Sterilizing effect	56
3.4.2	Deodorizing effect	56
3.4.3	Air purifying	57
3.4.4	Antifogging / Self cleaning	57
3.4.5	Water purification	57
3.5	TiO₂ photocatalysis process	60
3.5.1	Structure of different kinds of TiO ₂	65
3.6	Modification and improvement of photocatalytic activity	66
3.6.1	Scavengers	66
3.6.2	Doping of metals and metal ions	67
3.6.3	Coupling of different kinds of semiconductors	68
3.6.4	Dye sensitizers	68
3.7	Polyoxometallate	69

CHAPTER FOUR: PHOTODEGRADATION OF BUTYLTIN COMPOUNDS

4.1 Experimental	73
4.2 Materials	73
4.3 Photodegradation of tributyltin chloride	73
4.3.1 Preparation of stock solution	74
4.3.2 Spiking of tributyltin chloride in water	74
4.4 Photoreaction	74
4.4.1 Extraction	74
4.4.2 Grignard reaction	74
4.4.3 Hydrolysis of excess Grignard reagent	75
4.4.4 Extraction of the ethylated products	75
4.4.5 Addition of internal standard and analyzing by GC-FID	75
4.5 Photocatalytic degradation of tributyltin chloride	76
<i>Photocatalytic degradation of tributyltin chloride with TiO₂ (Degussa P₂₅)</i>	76
<i>Photocatalytic degradation of tributyltin chloride</i>	
<i>With mixed TiO₂ and POM</i>	77
<i>Photocatalytic degradation of tributyltin chloride with TiO₂ (anatase)</i>	77
<i>Photocatalytic degradation of tributyltin chloride(TBTCl)</i>	
<i>with TiO₂ (rutile)</i>	77
4.6 Determination of concentration of Tributyltin chloride	77
4.6.1 Internal standard	77
4.6.2 Derivatization	78
4.7 Photoreaction data	80
4.8 Photoreaction	86
<i>Langmuir equation</i>	87
<i>Modified Langmuir-hinshelwood equation</i>	88
4.8.1 Photoreaction mechanism and rate equation	90

CHAPTER FIVE: SYNTHESIS AND STRUCTURAL STUDIES OF DIBUTYLTIN COMPOUNDS

5.1 Experimental	97
5.2 Syntheses	98
5.2.1 Synthesis of dibutyltin esters of hydroxybenzoic acid	98
<i>Synthesis of dibutyltin ester of ortho-hydroxybenzoic acid</i>	98
<i>Synthesis of dibutyltin ester of meta-hydroxybenzoic acid</i>	98
<i>Synthesis of dibutyltin ester of para-hydroxybenzoic acid</i>	98
5.2.2 Synthesis of Schiff base ligands and their butyltin complexes	99
<i>Syntheses of 2- salicylideniminato-2-(hydroxymethyl)-</i> <i>1, 3-dihydroxypropane(Saltris)</i>	99
5.2.3 Synthesis of dibutyltin Schiff base complexes	100
<i>Synthesis of dibutyltin (IV) complex of saltris</i>	100
<i>Synthesis of 5- chlorosaltris complex of dibutyltin(IV)</i>	100
<i>Synthesis of 5 -bromosaltris complex of dibutyltin (IV)</i>	101
<i>Synthesis of 5- nitrosaltris complex of dibutyltin (IV)</i>	101
5.3 Characterization dibutyltin(IV) complexes-of hydroxybenzoic acid	102
5.3.1 IR spectroscopic analysis of hydroxybenzoic acid and complexes	104
5.3.2 NMR spectroscopic study	107
5.3.3 X-ray crystallographic study of dibutyltin ester of o-hydroxybenzoic acid	112
5.3.4 X-ray structure of dibutyltin bis(o-hydroxybenzoate)	112

5.3.5	Single crystal data for bis[1,1,3,3-tetrabutyl-1,3-bis [2- hydroxybenzoato) 1,3-distannoxane]	116
5.4	Dibutyltin complexes of Schiff base ligands	125
5.5	IR spectra data for dibuthyl saltris ligands and complexes	127
5.6	NMR data of Schiff base ligands and their dibutyltin complexes	129
5.7	X-ray crystallographic study of dibutyltin 5-chlorosaltris complex	135
5.8	References	142
