| ABSTRACT | iii |
| ABSTRAK | v |
| ACKNOWLEDGEMENT | vii |
| TABLE OF CONTENT | viii |
| LIST OF FIGURES | xii |
| LIST OF TABLES | xvi |
| LIST OF SYMBOLS AND ABBREVIATION | xvii |
| LIST OF APPENDICES | xx |
| | |
| CHAPTER 1.0 INTRODUCTION | |
| | |
| 1.1 Heavy Metals | 2 |
| 1.2 Mercury | 2 |
| 1.2.1 Mercury Sources | 4 |
| 1.2.1.1 Natural Sources | 4 |
| 1.2.1.2 Anthropogenic Sources | 5 |
| 1.2.2 Problems with Mercury | 7 |
| 1.2.2.1 Health Effect to Human | 7 |
| 1.2.2.2 Catalyst Poisoning | 8 |
| 1.2.2.3 Corrosion | 10 |
| 1.3 Heavy Metals Removal System for Water | 10 |
| 1.3.1 Adsorption Process | 11 |
| 1.3.1.1 Chemisorptions | 12 |
| 1.3.1.2 Physisorptions | 13 |

| | | |
|---------|---------------------------------|----|
| 1.4 | Active Materials for Adsorption | 14 |
| 1.4.1 | Metal Based Materials | 15 |
| 1.4.2 | Natural Materials | 18 |
| 1.4.3 | Carbon Based Materials | 20 |
| 1.4.3.1 | Activated Carbon | 22 |
| 1.4.3.2 | Carbon Nanotubes | 23 |
| 1.5 | Significant of Study | 28 |
| 1.6 | Objective of Study | 29 |

2.0 LITERATURE REVIEW

| | | |
|-------|--|----|
| 2.1 | Mercury Removal System from Water | 31 |
| 2.2 | Functionalization of Carbon Based Materials | 33 |
| 2.2.1 | Activated Carbon | 34 |
| 2.2.2 | Multiwalled Carbon Nanotubes (MWCNTs) | 36 |
| 2.2.3 | Single Walled Carbon Nanotubes (SWCNTs) | 40 |
| 2.3 | Removal of Divalent Ions Using Functionalized Carbon Based Materials | 41 |
| 2.3.1 | Activated Carbon for Divalent Ion Removal | 41 |
| 2.3.2 | MWCNTs for Divalent Ion Removal | 44 |
| 2.3.3 | SWCNTs for Divalent Ion Removal | 49 |
| 2.4 | Removal Mercury Ion Using Carbon Based Materials | 50 |
| 2.4.1 | Activated Carbon for Mercury Ion Removal | 50 |
| 2.4.2 | Multiwalled Carbon Nanotubes for Mercury Ion Removal | 52 |

3.0 METHODOLOGY

| | | |
|---------|--|----|
| 3.1 | Materials | 54 |
| 3.1.1 | List of Chemicals | |
| 3.1.2 | Multiwalled Carbon Nanotubes (MWCNTs) | 55 |
| 3.2 | Purification of MWCNTs | 55 |
| 3.3 | Modification of MWCNTs | 55 |
| 3.4 | Characterization of The Modified MWCNTs | 58 |
| 3.4.1 | Surface Acidic Determination | 58 |
| 3.4.2 | Elemental Structural Characterization | 59 |
| 3.4.3 | Texture and Porosity Determination | 60 |
| 3.4.4 | Morphology | 61 |
| 3.5 | Adsorption Isotherm Studies | 62 |
| 3.5.1 | Preparation of Mercury Stock Solution | 62 |
| 3.5.2 | Preparation of Mercury Aqueous Solution Series | 62 |
| 3.5.3 | Equilibrium Adsorption Experiment | 64 |
| 3.5.4 | ICPMS Measurement | 64 |
| 3.5.4.1 | Standard Calibration | 65 |
| 3.5.5 | Analysis of Data | 66 |
| 3.5.5.1 | Langmuir Isotherm | 66 |
| 3.5.5.2 | Freundlich Isotherm | 67 |
| 3.6 | Scope of Study | 68 |

4.0 RESULTS AND DISCUSSION

| | | |
|---------------------|--|-----|
| 4.1 | Purification of MWCNTs | 70 |
| 4.2 | Surface Acidity | 73 |
| 4.3 | Thermal Stability | 79 |
| 4.4 | Functional Group Identification | 84 |
| 4.5 | Powder X-ray Diffraction | 90 |
| 4.6 | Raman Spectroscopy | 93 |
| 4.7 | Texture and Porosity of the Functionalized MWCNTs | 97 |
| 4.8 | High Resolution Transmission Electron Microscopy (HRTEM) | 103 |
| 4.9 | Equilibrium Adsorption of Mercury Ion on Adsorbents | 109 |
| 4.10 | Langmuir and Freundlich Isotherms | 112 |
| 5.0 | CONCLUSION | 123 |
| 5.1 | Recommendations | 125 |
| BIBLIOGRAPHY | | 126 |
| APPENDICES | | 135 |
