

LIST OF FIGURES

FIGURES		PAGE
2.1 :	Map of Pulau Carey or Carey Island (http://www.giantleaf.com)	21
4.1 :	The percentage distribution of phytoplankton orders in each division.	38
4.2 :	Dendrogram of similarities in species composition among the communities determined by Modified Morisita's Similarity.	84
4.3 :	The species richness and cells abundance (cell/ml) of phytoplankton at ST1 during high tide.	87
4.4 :	Occurrence of some species of order Chaetocerotales at ST1 during high tide.	87
4.5 :	The Shannon-Weiner Diversity Index (H') and Evenness (E) of phytoplankton at ST1 during high tide.	88
4.6 :	The species richness and cells abundance (cells/ml) of phytoplankton at ST1 during high tide.	90
4.7 :	The Shannon-Weiner Diversity Index (H') and Evenness of phytoplankton at ST1 during low tide.	91
4.8 :	The species richness and cells abundance (cell/ml) of phytoplankton at ST2 during high tide.	94
4.9 :	Occurrence of some species of order chaetocerotales at ST2 during high tide.	94
4.10 :	The Shannon-Weiner Index (H') and Evenness (E) of phytoplankton at ST2 during high tide.	95

4.11 :	The species richness and cells abundance (cells/ml) of phytoplankton at ST2 during low tide.	97
4.12 :	The Shannon-Weiner Index (H') and Evenness (E) of phytoplankton at ST2 during low tide.	99
4.13 :	The species richness and cells abundance (cells/ml) of phytoplankton at ST3 during high tide.	102
4.14 :	Occurrence of some species of order Chaetocerotales at ST3 during high tide.	102
4.15 :	The Shannon-Weiner Index (H') and Evenness (E) of phytoplankton at ST3 during high tide.	103
4.16 :	The species richness and cells abundance (cells/ml) of phytoplankton at ST3 during low tide.	105
4.17 :	The Shannon-Weiner Index (H') and Evenness (E) of phytoplankton at ST3 during high tide.	106
4.18 :	Dendogram of Modified Morisita's Index based on species composition of phytoplankton in different months during high tide.	108
4.19 :	Dendogram of Modified Morisita's Index based on species composition of phytoplankton in different months during low tide.	110
4.20 :	Graph mean of nitrate concentration during high tide and low tide.	111
4.21 :	Nitrate concentration at all stations during high tide.	112
4.22 :	Nitrate concentration at all stations during low tide.	112
4.23 :	Graph mean of phosphate during high tide and low tide.	113

4.24 :	Phosphate concentration at all stations during high tide.	113
4.25 :	Phosphate concentrations at all stations during low tide.	113
4.26 :	Graph mean of silica concentration during high tide and low tide.	114
4.27 :	Silica concentration at all stations during high tide.	114
4.28 :	Silica concentration at all stations during low tide.	115
4.29 :	Graph mean of sulphate concentration during high tide and low tide.	115
4.30 :	Sulphate concentration at all stations during high tide.	116
4.31 :	Sulphate concentration at all stations during low tide.	116
4.32 :	Graph mean of water temperature during high tide and low tide.	117
4.33 :	Temperature at all stations during high tide.	118
4.34 :	Temperature at all stations during low tide.	118
4.35 :	Graph mean of conductivity during high tide and low tide.	119
4.36 :	Conductivity at all stations during high tide.	119
4.37 :	Conductivity at all stations during low tide.	120
4.38 :	Graph mean of dissolved oxygen during high tide and low tide.	121
4.39 :	Dissolved oxygen at all stations during high tide.	121
4.40 :	Dissolved oxygen at all stations during low tide.	122
4.41 :	Graph mean of total dissolved solid during high tide and low tide.	123

4.42 :	Total dissolved solid at all stations during high tide.	123
4.43 :	Total dissolved solid at all stations during low tide.	124
4.44 :	Graph mean of salinity during high tide and low tide.	125
4.45 :	Salinity at all stations during high tide.	125
4.46 :	Salinity at all stations during low tide.	126
4.47 :	Graph mean of pH during high tide and low tide.	126
4.48 :	pH at all stations during high tide.	127
4.49 :	pH at all stations during low tide.	127
4.50 :	Correlation between phytoplankton number and nitrate concentration at ST3 during high tide.	129
4.51 :	Scatter plot on correlation between phytoplankton number and nitrate concentration at ST3 during high tide.	129
4.52 :	Scatter plot on correlation of phytoplankton number and nitrate concentration at ST1 during low tide.	130
4.53 :	Scatter plot on correlation between phytoplankton number and nitrate concentration during low tide.	130
4.54 :	Correlation between phytoplankton number and phosphate concentration at ST1 during low tide.	131
4.55 :	Correlation between phytoplankton number and phosphate concentration at ST3 during low tide.	131
4.56 :	Correlation between phytoplankton number and phosphate concentration at ST3 during low tide.	132
4.57 :	Correlation between phytoplankton abundance and silicate concentration at ST2 during high tide.	133
4.58 :	Correlation between phytoplankton abundance and	133

	silicate concentration at ST3 during high tide.	
4.59 :	Correlation between phytoplankton abundance and silicate concentration at ST1 during low tide.	134
4.60 :	Correlation between phytoplankton abundance and sulphate concentration at ST1 during low tide.	134
4.61 :	Correlation between phytoplankton abundance and sulphate concentration at ST1 during low tide.	135
4.62 :	Non-linear positive correlation between phytoplankton abundance and sulphate concentrations during high tide.	136
4.63 :	Correlation between phytoplankton abundance and temperature at ST1 during high tide.	137
4.64 :	Correlation between phytoplankton abundance and temperature at ST2 during high tide.	137
4.65 :	Correlation between phytoplankton abundance and temperature at ST3 during high tide.	138
4.66 :	Correlation between phytoplankton abundance and temperature at ST1 during low tide.	138
4.67 :	Correlation between phytoplankton abundance and dissolved oxygen at ST1 during high tide.	140
4.68 :	Correlation between phytoplankton abundance and dissolved oxygen at ST2 during high tide.	141
4.69 :	Correlation between phytoplankton abundance and dissolved oxygen at ST3 during high tide.	141
4.70 :	Correlation between phytoplankton abundance and dissolved oxygen at ST1 during low tide.	142

4.71 : Correlation between phytoplankton abundance and 142
dissolved oxygen at ST2 during low tide.
