APPENDIX B  Duplication data for optimisation of washing pre-treatment

Figure B1  Light metal concentration leached out per gram of biosorbent for different biosorbent concentration in 200 mL UPW

Figure B2  Heavy metal concentration per gram of biosorbent for different biosorbent concentration in 200 mL UPW
Figure B3  Light metal concentration per gram of biosorbent for different immersion time

Figure B4  Heavy metal concentration per gram of biosorbent for different immersion time
Figure B5  Percentage of light metal removal for different number of washing cycle

Figure B6  Percentage of heavy metal removal for different number of washing cycle
Figure B7  The effect of NW-PSMC and PSMC on Ni(II) biosorption efficiency
