APPENDIX 6-2

Assessment using Spearman's rank-order correlation within dependent variables

	1	2	3	4	5	6	7	8
1		0.751**	0.737**	0.637**	0.594**	0.621**	0.539**	0.681**
2	0.751**		0.774**	0.660**	0.689**	0.716**	0.628**	0.737**
3	0.737**	0.774**		0.687**	0.544**	0.743**	0.638**	0.718**
4	0.637**	0.660**	0.687**		0.824**	0.826**	0.648**	0.680**
5	0.594**	0.689**	0.544**	0.824**		0.750**	0.679**	0.700**
6	0.621**	0.716**	0.743**	0.826**	0.750**		0.749**	0.698**
7	0.539**	0.628**	0.638**	0.648**	0.679**	0.749**		0.668**
8	0.681**	0.737**	0.718**	0.680**	0.700**	0.698**	0.668**	

*** Correlation is significant at the 0.01 level (2-tailed).

Legend:

(1) project completed on time

(2) scope well matched with organization's need

(3) system accepted by users

(4) user satisfied with information quality

(5) e-Purchasing systems provides sufficient information

(6) e-Purchasing systems user-friendly

(7) e-Purchasing systems beneficial for tasks of users and improve employee work

(8) project completed within allocated budget
