

LIST OF APPENDICES

Appendix A		Page
1)	PET Flakes.	72
2)	Experimental setup of glycolysis process	73
3)	Example calculation for preparation of glycolysed PET	74
4)	Determination of Hydroxyl value, OHv	75
5)	Determination of moisture content	78
6)	Determination of acid value	78
7)	Thermogravimetric analysis (TGA)	81
8)	Glycolysis of PET flakes	81
9)	Activation energy, Ea	82
Appendix B		
1)	Example calculation of foam blending	83
2)	FTIR during foaming process	85
3)	Effect of top and bottom core of foams on their density and compression strength	86
