

ACKNOWLEDGEMENTS

I would like to extend my deepest gratitude to my main supervisor, Dr. Nor Asrina Sairi for her invaluable guidance, suggestions, tolerance and encouragement throughout my research. Also a special thank to my co-supervisor Prof Yatimah Alias for her support and supervision.

Special appreciation goes to Prof. Douglas MacFarlane, Dr. Vijayaragha Ranganathan and Dr. Usman Ali Rana for their priceless guidance, suggestions and warmest hospitality during the attachment of my studies in Monash University, Melbourne, Australia.

Not to forget, a warm thank to all UMCiL research group members and D220 laboratory colleagues for their helps and advices.

Finally, I owe my deepest appreciation to my family for their love, concern and support. For my husband and daughter who has always have faith in me at all times and believing that I could get through this. None of this would have been possible without the love and patience from them.

Thank You

Wan Melissa Diyana binti Wan Normazlan
