

LIST OF TABLE

Table 1.1	Malaysia's Polyolefins Facilities	18
Table 1.2	Classification of polyethylene by density	21
Table 2.1	Synthesis of complexes	27
Table 2.2	Synthetic parameter and parameters of the synthesized complexes	34
Table 2.3	UV-visible reflectance spectra of the complexes	36
Table 2.4	Selected IR spectra bands of complexes	40
Table 2.5	The differences between $\nu_{\text{asym}}(\text{OCO})$ and $\nu_{\text{sym}}(\text{OCO})$ of complexes	41
Table 2.6	Compositions of elemental in complexes	44
Table 2.7	Percentage of Cr metal and Fe metal analysed by XRF analysis	45
Table 2.8	Thermal analysis data of complexes	47
Table 2.9	Crystallographic data for CI[1] and CI[4]	50
Table 3.1	Determination of dead volume	64
Table 3.2	Kinetic data for the polymerization of ethylene using CI[1] and Al/Cr molar ratio of 26.2 at 30°C	68
Table 3.3	Optimum Al/Cr molar ratio and the maximum initial activity of the polymerization of ethylene at 30°C	78
Table 3.4	Catalytic activity and the yield of PE produced by various catalysts	82
Table 3.5	Catalytic activity and yield of PE using CI[1] and CI[5] at 30°C	83
Table 3.6	Catalytic activity and yield of PE polymerized using CI[1] and CI[5] at different temperatures	85
Table 3.7	Bands assignment for the IR spectrum of PE	88
Table 3.8	Bands assignment for the PE- CI[1] IR spectrum at different Al/Cr molar ratios	89
Table 3.9	DSC data for PE- CI[1] at various of Al/Cr molar ratios	93
Table 3.10	DSC data of PE produced by different catalysts	93
Table 3.11	Difference between T_m , T_c and the percentage of crystallinity for PE- CI[1] at various Al/Cr molar ratios	93

Table 3.12	Difference between T_m , T_c and the percentage of crystallinity for PE produced by different catalysts	94
Table 4.1	Variation of SMRCV added in the polymerization	104
Table 4.2	Catalytic activity and total pressure drop for the polymerization of ethylene-SMRCV	111
Table 4.3	Band assignment for IR spectrum of PE-SMRCV	114
Table 4.4	The percentage of weight loss, range of degradation, onset temperature (T_{onset}) and derivative peak temperature (DT_p) of polymer	116
Table 4.5	Intensity of peak at $2\theta = 14^\circ$ and percentage of crystallinity	118
Table A.1	Fractional atomic coordinates and isotropic or equivalent isotropic displacement parameters (\AA^2) of CI[1]	126
Table A.2	Atomic displacement parameters (\AA^2) of CI[1]	127
Table A.3	Bond length of CI[1]	128
Table A.4	Bond angles of CI[1]	129
Table A.5	Fractional atomic coordinates and isotropic or equivalent isotropic displacement parameters (\AA^2) of CI[4]	130
Table A.6	Atomic displacement parameters (\AA^2) of CI[4]	131
Table A.7	Bond length of CI[4]	132
Table A.8:	Bond angles of CI[4]	133
