

ABSTRACT	i
ABSTRAK	iii
ACKNOWLEDGEMENT	v
TABLE OF CONTENTS	vi
LIST OF FIGURES	xiii
LIST OF TABLES	xviii
LIST OF SCHEMES	xx
LIST OF ABBREVIATIONS	xxi
CHAPTER 1	
1 General Introduction	
1.1 Catalyst and Catalysis : General Review	1
1.1.1 The Behavior of the Catalyst	9
1.1.1.1 Surface Area and Crystallite Size	
1.1.1.2 Catalyst Shape and Size	
1.1.1.3 The Role of Support	
1.1.1.4 The Role of Promoter	
1.2 Organization of Catalysis	14
1.2.1 Homogeneous Catalysis	15
1.2.2 Heterogeneous Catalysis	16
1.3 Properties of Catalyst	19
1.3.1 Activity	19
1.3.2 Selectivity	21
1.3.3 Lifetime	22

1.4	Oxidation Reaction	25
1.4.1	Dehydrogenation reactions	26
1.4.2	Dehydrogenation and oxygen insertion reactions	27
1.4.3	Catalytic Reactions	27
1.5	Aim of the study	30
CHAPTER 2		
2	Literature Review on Catalysts Systems	
2.1	Overview on Catalyst Technologies of Propane	33
2.2	Acrylic Acid	36
2.2.1	Physical and Chemical Properties of Acrylic Acid	37
2.2.2	Application of Acrylic Acid	39
2.2.3	Worldwide Demand	44
2.2.4	Production of Acrylic Acid	51
2.2.4.1	Historical Production of Acrylic Acid	52
2.2.4.2	Process and Technology	53
2.3	Reviews on Development of Catalyst for Selective Oxidation Reaction	59
2.4	Catalyst Preparation of MoVTeNb mixed oxide catalyst.	63
2.4.1	Precipitation Method	63
2.4.2	Solidification on aqueous slurry solution	70
2.5	Surface Modification Techniques on MoVTeNb Oxide Catalyst	73
2.5.1	Leaching	73

2.5.2	Solvents Properties	82
2.5.2.1	Water	74
2.5.2.2	Nitric acid	75
2.5.2.3	Ammonia	77
CHAPTER 3		
3	Methodology	78
3.1	Materials and Gases	
3.1.1	List of materials and gases used	80
3.2	Preparation of Catalyst Precursor	81
3.2.1	LaBMax (Stock Solution Workstation)	81
3.2.2	Drying Stock Solution (Büchi Mini Spray Dryer B-290)	84
3.3	Preparation method and condition for the	88
	Mo₁V_{0.3}Te_{0.23}Nb_{0.125} Oxide Catalyst	
3.3.1	The Undiluted System	
3.3.1.1	Preparation of precursor without addition of oxalic acid (standard recipe)	88
3.3.1.2	Preparation of precursor with addition of oxalic acid	89
3.3.2	The Diluted System	
3.3.2.1	Preparation of precursor without addition of oxalic acid	89
3.3.2.2	Preparation of precursor with addition of oxalic acid	90
3.4	Spray Dryer Method	92
3.5	Catalyst Activation	93
3.6	Surface Modification on MoVTenb Oxide Catalyst	94

	(i) The undiluted $\text{Mo}_1\text{V}_{0.3}\text{Te}_{0.23}\text{Nb}_{0.125}$ leached in different solvents i.e; water, ammonia and nitric acid for 1 hour.	95
	(ii) The undiluted $\text{Mo}_1\text{V}_{0.3}\text{Te}_{0.23}\text{Nb}_{0.125}$ Oxide leached in water at different times.	95
	(iii) The undiluted and diluted $\text{Mo}_1\text{V}_{0.3}\text{Te}_{0.23}\text{Nb}_{0.125}$ catalysts leached in water for 1 hr	95
	(iv) The undiluted and diluted $\text{Mo}_1\text{V}_{0.3}\text{Te}_{0.23}\text{Nb}_{0.125}$ catalysts leached in water for 24 hrs	95
3.7	Catalyst Characterization	
3.7.1	X-Ray Powder Diffraction (XRD)	95
3.7.2	X-Ray Fluorescence (XRF)	
	(i) Preparation of solid samples	101
	(ii) Preparation of liquid or loose powder samples	
	(iii) Preparation of filter samples	
3.7.3	Scanning Electron Microscope (SEM/EDX)	111
3.7.4	Nitrogen Physisorption (BET)	114
3.7.5	Fourier Transform Infrared Spectroscopy (FTIR)	120
3.7.6	In-Situ Raman Spectroscopy	121
3.7.7	Thermal Analysis	
	(i) Thermogravimetric Analysis with Mass Spectroscopy (TG-MS)	123
	(ii) Differential Scanning Calorimetry (DSC)	126
	(iii) Temperature Programmed Reduction by Hydrogen (TPR)	129

	(iv) Temperature Programmed Reaction Spectroscopy (TPRS)	131
3.8	High-throughout Experimentation	134
3.8.1	High-throughput Nanoflow System	134
3.8.2	Evaluation on Catalyst Screening and Catalytic Performance	138
3.8.2.1	Introduction on COMBICAT Nanoflow	
3.8.2.2	Product Analysis	
CHAPTER 4	Catalyst Screening	
4.1	The procedure of catalyst screening using High Throughput Syatem	145
4.1.1	Definitions and formula for determination of the catalytic performance towards acrylic acid product	147
4.1.2	Calculations of conversion and selectivity using carbon balance	148
4.1.3	Reaction Stoichiometry and Reaction Pathways	149
4.2	Blank run experiment and reproducibility of testing catalytic materials in Nanflow system	152
4.3	Effect of reaction temperature for undiluted MoVTeNb oxide catalyst	153
4.4	Effect of different reaction temperature for diluted MoVTeNb oxide catalyst.	158
CHAPTER 5		
5	Result And Discussion	
5.1	Catalyst Preparation	165
5.1.1	Synthesis of Precursor	165
5.1.2	In-situ Raman Spectroscopy in Solutions	170

5.1.3	Solidification/Drying	178
5.1.4	Activation	182
5.2	Catalyst Characterization	186
5.2.1	XRD	187
(i)	Undiluted system	195
(ii)	Diluted system	195
5.2.2	Micromorphology and Elemental Composition by SEM/EDX	198
(a)	Undiluted system	199
(b)	Diluted system	203
5.2.3	XRF	205
5.2.4	FT-IR	206
5.2.5	BET	211
5.3	Thermal Analysis	215
5.3.1	TG	215
5.3.2	DSC	222
5.3.3	TPR	228
CHAPTER 6 SURFACE MODIFICATION ON MoVTeNb OXIDE CATALYST		
6.1	Effect of leaching in different solvent	231
6.1.1	Catalytic Reactivity by TPRS	234
6.1.2	Structural Analysis by Powder X-Ray Diffraction	236
6.1.3	Morphology and Elemental Composition Analysis (SEM/EDX and X-Ray Fluorescence)	238

6.2	Effect of leaching in different time	246
6.2.1	Catalytic Activity by TPRS Structural Analysis by Powder X-Ray Diffraction	248
6.2.2	Catalyst Screening and effect of dilution of water leached catalyst by HT Nanoflow	250
6.2.3	Structural Analysis by Powder X-Ray Diffraction	255
6.2.4	Morphology and Elemental Composition Analysis (SEM/EDX and X-Ray Fluorescence)	258
6.2.5	Fluorescence Analysis (XRF)	262
6.3	Structure-Activity Relationship	264
CHAPTER 7	CONCLUSION	269
APPENDICES		275
