

## LIST OF TABLES

Table 2.1	: The United Nation Working List of Sustainable Development Indicators	32
Table 2.2	: Definitions of Green Building	39
Table 2.3	: Differentiations of Sustainable and Green Building	41
Table 2.4	: Green Building Index Classification	53
Table 2.5	: Sustainability Principles of Building and the Supporters	69
Table 2.6	: Strategies to Integrate Sustainability into the Project Planning Process and the Supporters	91
Table 2.7	: Key Criteria of Successful Project Performance	94
Table 3.1	: Distribution of Energy Consumption in Malaysian Buildings (%)	104
Table 3.2	: Urban Home Energy Consumption without Car (%)	104
Table 3.3	: Income Tax/Stamp Duty Incentives for GBI certified building	119
Table 3.4	: Tax Incentives for the Generation of Energy from Renewable Sources	120
Table 3.5	: Tax Incentives for Energy Conservation	120
Table 3.6	: GBI Malaysia Certified Buildings until October 2012	122
Table 3.7	: ASEAN Energy Awards for Energy Efficient Buildings	128
Table 3.8	: Preliminary Framework of Integrating Sustainability into the Project Planning Process	132
Table 4.1	: Total Malaysian Building Project Stakeholders	151
Table 4.2	: List of Respondents for Questionnaire Survey	153
Table 4.3	: Pilot Study and Distribution of Questionnaire for the Actual Fieldwork	156
Table 4.4	: Pilot Study and Case Study Fieldwork	156
Table 4.5	: List of Respondents	161
Table 4.6	: Quality of the Research Design	163
Table 5.1	: List of Respondents	166
Table 5.2	: Background of the Respondents	167
Table 5.3	: Respondents' Working Experiences in Construction Industry and their Involvement in Sustainable Building Project	168
Table 5.4	: Respondents' Involvement in the Planning Process of Sustainable Building Project	169
Table 5.5	: Respondents' Feedback on the Problems of Integrating Sustainability into the Malaysian Building Projects	172

Table 5.6	: Project stakeholders' Involvement in the Planning Process of Sustainable Building Project	174
Table 5.7	: Reliability Test on Sustainability Principles of Building	179
Table 5.8	: Reliability Test on the Strategies to Integrate Sustainability Principles into the Project Planning Process	180
Table 5.9	: Measure of Sampling Adequacy (MSA)	182
Table 5.10	: KMO and Bartlett's Test of Environmental Sustainability Principles of Building	184
Table 5.11	: Communalities of Environmental Sustainability Principles of Building	184
Table 5.12	: KMO and Bartlett's Test of Environmental Sustainability Principles of Building (reproduced after removing of 'conserving heritage' factor)	185
Table 5.13	: Communalities of Environmental Sustainability Principles of Building (reproduced after removing of 'conserving heritage' factor)	185
Table 5.14	: Total Variance Explained of Environmental Sustainability Principles of Building	186
Table 5.15	: Rotated Component Matrix of Environmental Sustainability Principles of Building	187
Table 5.16	: Summary of Results by Applying PCA for Environmental Sustainability of Building	187
Table 5.17	: KMO and Bartlett's Test of Economic Sustainability Principles of Building	188
Table 5.18	: Communalities of Economic Sustainability Principles of Building	188
Table 5.19	: Total Variance Explained of Economic Sustainability Principles of Building	188
Table 5.20	: Component Matrix (a) of Economic Sustainability Principles of Building	189
Table 5.21	: Summary of Results by Applying PCA for Economic Sustainability Principles of Building	189
Table 5.22	: KMO and Bartlett's Test of Social Sustainability Principles of Building	189
Table 5.23	: Communalities of Social Sustainability Principles of Building	190
Table 5.24	: KMO and Bartlett's Test of Social Sustainability Principles of Building (reproduced after removing of 'fairness' and 'macro social performance' factor)	190
Table 5.25	: Communalities of Social Sustainability Principles of Building (reproduced after removing of 'fairness' and 'macro social performance' factor)	191
Table 5.26	: Total Variance Explained of Social Sustainability Principles of Building	191
Table 5.27	: Rotated Component Matrix of Social Sustainability Principles of Building	192
Table 5.28	: Summary of Results by Applying PCA for Social Sustainability Principles of Building	192
Table 5.29	: KMO and Bartlett's Test of Design and Innovation Principles of Sustainability in Building	193

Table 5.30	: Communalities of Design and Innovation Principles of Sustainability in Building	193
Table 5.31	: Total Variance Explained of Design and Innovation Principles of Sustainability in Building	193
Table 5.32	: Component Matrix (a) of Design and Innovation Principles of Sustainability in Building	193
Table 5.33	: Summary of Results by Applying PCA for Design and Innovation Principles of Sustainability in Building	194
Table 5.34	: KMO and Bartlett's Test of Sustainable Orientation Project	194
Table 5.35	: Communalities of Sustainable Orientation Project	194
Table 5.36	: Total Variance Explained of Sustainable Orientation Project	195
Table 5.37	: Component Matrix (a) of Sustainable Orientation Project	195
Table 5.38	: Summary of Results by Applying PCA for Sustainable Orientation Project	195
Table 5.39	: KMO and Bartlett's Test of Integrated Project Team	196
Table 5.40	: Communalities of Integrated Project Team	196
Table 5.41	: Total Variance Explained of Integrated Project Team	196
Table 5.42	: Rotated Component Matrix of Integrated Project Team	197
Table 5.43	: Summary of Results by Applying PCA for Integrated Project Team	198
Table 5.44	: KMO and Bartlett's Test of Integrated Design Process	198
Table 5.45	: Communalities of Integrated Design Process	199
Table 5.46	: Total Variance Explained of Integrated Design Process	199
Table 5.47	: Rotated Component Matrix of Integrated Design Process	200
Table 5.48	: Summary of Results by Applying PCA for Integrated Design Process	200
Table 5.49	: KMO and Bartlett's Test of Regulations and Code Compliances	201
Table 5.50	: Communalities of Regulations and Code Compliances	201
Table 5.51	: Total Variance Explained of Regulations and Code Compliances	202
Table 5.52	: Component Matrix (a) of Regulations and Code Compliances	202
Table 5.53	: Summary of Results by Applying PCA for Regulations and Code Compliances	202
Table 5.54	: Frequency and Descriptive Analysis of Sustainability Principles of Building	203
Table 5.55	: The Highest Score of TIF and the Mean Value (MS)	205
Table 5.56	: Frequency and Descriptive Analysis of the Strategies to Integrate Sustainability into the Project Planning Process	207
Table 5.57	: The Highest Score of TIF and the Mean Value (MS)	209
Table 5.58	: Stakeholders' Preferences of Sustainability Principles of Building (Triangulation Measures)	211
Table 5.59	: Stakeholders' Preferences of the Strategies to Integrate Sustainability Principles into the Project Planning Process (Triangulation Measures)	212

Table 5.60	: Framework of Integrating Sustainability into the Project Planning Process (Stage 1)	213
Table 5.61	: RII of Sustainability Principles of Building	215
Table 5.62	: RII of Strategies to Integrate Sustainability into the Project Planning Process	216
Table 5.63	: Framework of Integrating Sustainability into the Project Planning Process (Stage 2)	217
Table 6.1	: The Case Building Projects' Information	221
Table 6.2	: Stakeholders' Involvement in the Project Planning Process	222
Table 6.3	: Finding Summary of Stakeholders' Involvement in the Project Planning Process	224
Table 6.4	: Stakeholders' Responses on the Sustainability Goals of the Projects	226
Table 6.5	: Sustainability Principles Documented and Considered during the Planning Process of the Case Building Projects	229
Table 6.6	: Overall Sustainability Principles Mentioned and Considered during the Planning Process of the Case Projects	230
Table 6.7	: Finding Summary of the Stakeholders' Responses on the Integration of Sustainability Principles into the Case Projects Planning Process	231
Table 6.8	: The Practiced Strategies to Achieve the Projects Sustainability Goals	233
Table 6.9	: Stakeholders' Responses on the Projects Strategies to Achieve the Sustainability Goals	234
Table 6.10	: Interviewees' Comments on Sustainability Integration Strategies into the Planning Process of the Building Projects	237
Table 6.11	: Overall Practiced Sustainability Integration Strategies into the Planning Process of the Case Building Projects	239
Table 6.12	: Finding Summary of Stakeholders' Responses on the Practiced Sustainability Integration Strategies into the Planning Process of the Case Building Projects	240
Table 6.13	: Stakeholders' Responses on the Level of Sustainability Performances of the Projects	242
Table 6.14	: Stakeholders' Responses on the Performances of Cost, Time, Quality and Stakeholders' Satisfaction of the Projects	243
Table 6.15	: Interviewees' Responses on the Overall Impact of the Projects Sustainability Principles Practices and the Integration Strategies into the Planning Process on Influencing the Projects Performances	244
Table 6.16	: Perceptions of Stakeholders on the Problems in LEO, GEO and Diamond Buildings Projects	245
Table 6.17	: Stakeholders' Preferences on the Sustainability Principles of Building	247
Table 6.18	: Stakeholders' Preferences on the Strategies to Integrate Sustainability into the Project Planning Process	248
Table 6.19	: Summary Findings of the Level of Importance of Sustainability Principles of Building and the Strategies to Integrate the Principles into the Project Planning Process	249
Table 6.20	: Framework of Integrating Sustainability into the Project Planning Process for Buildings (Final Stage)	251
