Designation: **Supervisor**

ABSTRACT

The advancement of technology allows people to communicate globally without barriers and thus, increases the usage of Computer-Mediated-Communication (CMC). One example of CMC is the social networking site. Social networking sites are popular and they continue to grow due to the large number of users. Many studies have been conducted to explore identity construction on the Internet and it was found that many users are publishing favourable images and information of themselves in order to maintain an ideal self among their audience. The purpose of this research is to examine how young Malaysians construct multiple identities and portray themselves in a self-preferred image projection via status updates on their Facebook profiles through the use of different linguistic, semiotic and visual features. This research wants to explore the range of identity claims people use in a non-anonymous online setting. The participants of this research comprised of ten males and ten females from the age group of 24 to 28. All participants are Malaysian citizens and are currently residing in Kuala Lumpur, a metropolitan city in Malaysia. This research is a qualitative research which uses the case study strategy in order to study a group of individuals based on data collected over a period of one month. The sampling methods used in this research are convenience sampling and homogenous sampling. Findings show that participants frequently use Facebook to keep in touch and to share thoughts with their audiences. Though gender identity is not intended for this research, it is found that male participants and female participants post significantly different topics of interest. Female participants show greater interest in friendship/relationship matters while male participants show greater interest in work-related or political issues. Most participants emphasise that they post whatever issues they wish to on Facebook and they are not concerned with how others view them but stress that they are cautious in their posts in order to avoid being offensive and to prevent misunderstanding. In short, identity construction does occur

among these young Malaysians. The research shows that the participants want to portray a positive image. Though no exact identity is identified, self-presentation is clearly reflected in the topics discussed and the writing strategies used by these participants.

ABSTRAK

Kemajuan teknologi membolehkan orang ramai untuk berkomunikasi secara global tanpa halangan dan ini turut meningkatkan penggunaan Komunikasi melalui Pengantaraan Komputer (KPK). Satu contoh penggunaan KPK adalah penggunaan laman rangkaian sosial. Penggunaan laman rangkaian sosial sangat popular dan terus berkembang disebabkan pengguna yang ramai. Banyak kajian telah dijalankan untuk memahami pembentukan identiti di Internet dan banyak pengguna didapati memaparkan gambar dan maklumat diri yang positif untuk mengekalkan imej diri yang ideal di kalangan rakan Facebook mereka. Tujuan kajian ini adalah untuk mengkaji bagaimana golongan muda Malaysia membina pelbagai identiti untuk mengekalkan imej diri yang positif melalui penggunaan pelbagai strategi dari segi linguistik, semiotik dan visual. Kajian ini dijalankan untuk memahami pelbagai identiti yang digunakan oleh pengguna melalui Facebook. Peserta kajian ini terdiri daripada sepuluh lelaki dan sepuluh perempuan dalam kumpulan umur 24 hingga 28. Mereka merupakan rakyat Malaysia yang kini tinggal di Kuala Lumpur, sebuah bandar metropolitan di Malaysia. Kajian ini merupakan satu kajian kualitatif yang menggunakan strategi kajian kes untuk mengkaji sekumpulan individu berdasarkan data yang dikumpul dalam tempoh satu bulan. Kaedah persampelan yang digunakan dalam kajian ini ialah persampelan mudah dan pensampelan *homogenous*. Hasil kajian menunjukkan bahawa semua peserta kerap menggunakan Facebook untuk berhubung dan berkongsi pemikiran dengan rakan mereka. Walaupun identiti gender bukan tujuan kajian ini, kedua-dua peserta-peserta lelaki dan perempuan didapati berkomunikasi tentang topik yang sangat berlainan. Peserta perempuan menunjukkan minat besar dalam hal-hal persahabatan / perhubungan manakala peserta lelaki menunjukkan minat besar dalam isu-isu yang berkaitan dengan kerjaya atau politik. Kebanyakan peserta mengatakan bahawa mereka tidak bimbang tentang pemikiran rakan terhadap mereka

tetapi menegaskan bahawa mereka berhati-hati dalam penulisan mereka untuk mengelakkan salah faham. Kesimpulannya, pembentukan identiti berlaku di kalangan generasi muda di Malaysia. Kajian ini menunjukkan bahawa para peserta ingin menggambarkan imej yang positif. Walaupun tiada identiti tertentu yang dikenal pasti, presentasi diri para peserta adalah jelas dari segi pilihan topik perbincangan dan strategi penulisan mereka.

ACKNOWLEDGEMENTS

I would like to extend my sincere appreciation to my supervisor, family and friends for this research paper entitled *Identity Construction on Facebook among Young Malaysians*.

My first thanks goes to my supervisor, Professor Dr. Azirah Hashim, who has guided me and provided me with a lot of help and assistance throughout this research.

I would also like to thank my former lecturer, Dr. Francisco Dumanig, who has continuously motivated me and provided me with useful information for this research.

I also wish to thank my husband, Nyagoslav Zhekov, who has contributed much time and effort in giving suggestions and proofreading my writing.

Last but not least, I wish to thank all my friends who willingly participated in this research by sharing their Facebook content and spending their precious time in sharing their thoughts with me.

TABLE OF CONTENTS

CHAPTER 1: INTRODUCTION

1.1 Background of research	1
1.2 Statement of the problem	5
1.3 Objective of the research	6
1.4 Research questions	7
1.5 Rationale of the research	8
1.6 Significance of the research	8
1.7 Scope and limitation	9

CHAPTER 2: LITERATURE REVIEW

2.1 The concept of identity	10
2.2 Young adult and identity	14
2.3 Online communities within computer-mediated-communication (CMC)	16
2.4 Social networking sites	19
2.5 The Facebook phenomenon	25
2.6 Factors that contribute to self-presentation	31
2.7 Gender as part of identity	32
2.8 How do individuals portray their self-presentation?	33
2.8.1 Using images to show physical attractiveness	33
2.8.2 Filtering comments in response to their status updates	35
2.8.3 Adjusting the privacy setting as a way of self-presentation	36
2.9 Real self vs. idealised self	37
2.10 Intentions for self-presentation	38
2.11 Conclusion	38

CHAPTER 3: METHODOLOGY

3.1 Introduction	40
3.2 Research design	40
3.3 Participants	41
3.4 Data collection	42
3.5 Sampling methods	45
3.6 Ethical considerations	45
3.7 Conclusion	46

CHAPTER 4: DATA ANALYSIS

4.1 Introduction	47
4.2 Linguistic features	48
4.2.1 Code-mixing and code-switching in status updates	49
4.2.1.1 Code-mixing using different languages	51
4.2.1.2 Code-switching using different languages	53
4.2.1.3 Reasons for using different languages in status updates	54
4.2.2 Different lexical items in status updates	55
4.2.2.1 Pronouns in the status updates	58
4.2.2.2 Expressions of laughter or sounds in the written form	61
4.2.2.3 Fillers in status updates	63
4.2.2.4 Adjectives in status updates	64
4.2.2.5 Short forms or contractions in status updates	66
4.2.2.6 Vulgar words in status updates	67
4.2.2.7 Different forms of English language	69
4.2.3 Grammatical structures	70
4.3 Semiotic features	72

4.3.1 Punctuation markers	73
4.3.1.1 Ellipsis in status updates	75
4.3.1.2 Repetitive exclamation marks in status updates	76
4.3.1.3 Repetitive question marks in status updates	76
4.3.1.4 Mixed-repetitive exclamation and question marks in status updates	77
4.3.1.5 Tilde or repetitive tilde in status updates	78
4.3.1.6 Other punctuation markers in status updates	79
4.3.2 Capitalisation in status updates	79
4.3.2.1 All-capitalised words in status updates	82
4.3.2.2 Small letter (or non-capitalised) words in status updates	84
4.3.2.3 Mixed-capitalisation in status updates	84
4.3.3 Emoticons in status updates	85
4.4 Visual Features	88
4.4.1 Profile pictures	88
4.4.2 Photo albums	89
4.5 Additional features to reflect self-representation in status updates	91
4.5.1 The general content of the status updates	91
4.5.2 Topics discussed in status updates	93
4.5.3 Sharing locations and tagging friends in status updates	95
4.5.4 Participants' replies in response to their audience's comments to the status updates	97
4.6 Participants' identity construction	99
4.7 Conclusion	103

CHAPTER 5: CONCLUSION	
5.1 Conclusion	105
5.2 Possible future research	107
