

**UNIVERSITI MALAYA**  
**ORIGINAL LITERARY WORK DECLARATION**

Name of Candidate: Yap Jia Rong

(I.C/~~Passport~~ No: 851012-10-5308)

Registration/Matric No: TGB120010

Name of Degree: Master of English as a Second Language

Title of Project Paper/Research Report/Dissertation/Thesis (“this Work”):

“Using Systematic Synthetic Phonics as an Approach for Early Literacy: The Case of Rural Indigenous Children”

Field of Study: Applied Linguistics

I do solemnly and sincerely declare that:

- (1) I am the sole author/writer of this Work;
- (2) This Work is original;
- (3) Any use of any work in which copyright exists was done by way of fair dealing and for permitted purposes and any excerpt or extract from, or reference to or reproduction of any copyright work has been disclosed expressly and sufficiently and the title of the Work and its authorship have been acknowledged in this Work;
- (4) I do not have any actual knowledge nor do I ought reasonably to know that the making of this work constitutes an infringement of any copyright work;
- (5) I hereby assign all and every rights in the copyright to this Work to the University of Malaya (“UM”), who henceforth shall be owner of the copyright in this Work and that any reproduction or use in any form or by any means whatsoever is prohibited without the written consent of UM having been first had and obtained;
- (6) I am fully aware that if in the course of making this Work I have infringed any copyright whether intentionally or otherwise, I may be subject to legal action or any other action as may be determined by UM.

## **ABSTRACT**

The majority of empirical research into systematic phonics was focused on native speakers of the English Language. Little evidence has been collected to prove its effectiveness with audiences who are English Language Learners (ELL). The purpose of this quantitative randomized comparison experimental study was to determine if systematic synthetic phonics (SSP) instruction records a better improvement than the KSSR phonics in the reading fluency and spelling ability of Year-2 primary school children of the indigenous tribe from the rural parts in Sarawak, Malaysia. Five instruments, (1) productive letter-sound test (PLST), (2) free-sound isolation test (FSIT), (3) reading test (RT), (4) spelling test (ST) and (5) oral-reading fluency test (ORFT) were administered to measure phonemic awareness, decoding, reading and spelling ability. Data were collected from pretest, immediate posttest and 3-week lapsed posttest. The participants in the experimental and control groups received 40 sessions of SSP and KSSR phonics training respectively. Both conditions used synthetic phonics. The SSP training was done in phases and stages, whilst the KSSR phonics training adhered to the practices specified in the ‘Standard Document’ and pupil’s textbook. The results demonstrated that both groups recorded significant improvement in reading and spelling, but children’s performance in the experimental group surpassed the control group significantly. Thus, the strategy of systematic synthetic phonics should be implemented in classrooms to help develop children’s early reading fluency and spelling ability.

## **ABSTRAK**

*Majoriti penyelidikan empirikal dalam fonik sistematik tertumpu kepada penutur asli Bahasa Inggeris. Tidak banyak bukti telah dikumpulkan untuk membuktikan keberkesanannya dengan Pelajar Bahasa Inggeris (ELL). Tujuan kajian kuantitatif yang membuat perbandingan melalui eksperimen adalah untuk menentukan sama ada latihan sistematik sintetik fonik (SSP) mencatatkan peningkatan yang lebih baik daripada KSSR fonik dalam kefasihan bacaan dan keupayaan ejaan murid-murid Tahun -2 daripada suku asli dari bahagian-bahagian luar bandar dan pendalamatan Sarawak, Malaysia. Lima instrumen,(1) ujian produktif bunyi-huruf (PLST), (2) ujian pengasingan bunyi (FSIT), (3) ujian membaca (RT), (4) ujian ejaan (ST) dan (5) ujian kefasihan membaca (ORFT) ditadbir untuk mengukur kesedaran fonemik, keupayaan menyahkod, membaca dan mengeja. Data dikumpulkan dari ujian pra , ujian pos serta-merta dan ujian pos selang 3-minggu. Rasionalnya adalah untuk menentukan peningkatan sejurus selepas latihan fonik, dan pengekalan kemahiran fonik. Keputusan menunjukkan bahawa kedua-dua kumpulan mencatatkan peningkatan yang ketara dalam membaca dan ejaan, tetapi prestasi kanak-kanak dalam kumpulan eksperimen mele过asi dengan ketaranya kumpulan kawalan. Oleh itu, strategi sistematik sintetik fonik perlu dilaksanakan di dalam bilik darjah untuk membantu membangunkan kefasihan bacaan awal dan keupayaan ejaan murid.*

## **ACKNOWLEDGEMENT**

I would like to express my special appreciation and thanks to my supervisor Associate Professor Dr. Kuang Ching Hei for the useful comments, remarks and engagement through the learning process for this master dissertation. I would like to thank you for encouraging my research. Your advice on this research has been priceless. I would also like to thank my committee members, Dr. Patricia Nora Anak Riget, Dr. Rachel Tan Siew Kuang, Puan Ainun Rozana Mohd Zaid and Dr. Azlin Zaiti Zainal. I want to thank you for letting both my proposal presentation and candidature defence be an enjoyable moment, and for your valuable suggestions.

I would like to thank the officers at Bintulu District Education Office for providing information pertaining schools in the district. I would like to thank the teachers and the school authorities for their support, who have willingly shared their precious time during the experiment periods. I would like to thank the participants' families for allowing their children to participate in my research. I would also like to thank my colleagues, for all the help and support which they have generously extended. Last but certainly not the least, a special thanks to all my loved ones who have supported me throughout the entire experiment and writing processes, and incited me to strive towards my goal.
