ABSTRACT

The systems of tense, as in the ways of correlating time in connection with the occurrence of events/states is different in the English and Malay language. As the English language utilizes tense to make back and forth references to the past and future, the Malay language is a tenseless language as “Malay does not have a system of tense” (Asmah Haji Omar, 2000, p.97). This grammatical system leads to differences in terms of how time and the occurrence of states/events are expressed in the two languages. Although research on tense in translated texts have been prevalent (Zawaiyah, 2009, Xiao and McEnergy, 2002) little interest has been shown in utilizing functional linguistics to analyze tense in translated texts from English to Malay. This study investigates the usage of past tense and future events in two stories of Sherlock Holmes and their respective translations in Malay using the framework of past tense and future events by Downing and Locke (2006) based on M.A.K. Halliday’s functional approach to language. The findings reveal that for both stories in English, the past tense is utilized most frequently for references to events/states which happened solely in the past while future events is employed frequently to refer to predictions made for the future. Conversely, in the Malay translations, the findings show that “sudah” and “telah” are used to depict past states/events while “akan” is utilized to indicate future time events. The study also shows that the Malay translated stories utilized lexical and phrases such as “tadi” meaning “earlier”, “sekiranya” and “seandainya” meaning “if”, “kata” and “katanya” meaning “said” as a substantiation for the absence of a referent for the past tense. Meanwhile, the usage of context, lexical and phrases such as “esok” meaning “tomorrow” and “sehari dua ini” meaning “these two days” complimented for the absence of a referent for the future events. It is hoped that the current study is able to provide insights on the resources used in the expression of past tense and future events whereby the tense structure is absent in the translated language.

ABSTRAK

Kaedah untuk mengaitkan masa dengan situasi/peristiwa yang berlaku dengan sistem kala adalah berbeza dalam bahasa Inggeris dan Melayu. Bahasa Inggeris boleh menggunakan sistem kalanya untuk merujuk kepada peristiwa yang lalu dan akan datang. Walaupun begitu, bahasa Melayu merupakan satu bahasa yang tidak mempunyai sistem kala. Sistem tatabahasa ini menyebabkan wujudnya perbezaan pada expresi masa sesuatu situasi/peristiwa dalam kedua-dua bahasa tersebut. Walaupun kajian pada aspek kala dalam teks penterjemahan adalah terhad (Zawaiyah, 2009, Xiao and McEnery, 2002) kajian yang menggunakan linguistik fungsional untuk menganalisis kala dalam teks yang diterjemahkan daripada bahasa Inggeris kepada bahasa Melayu adalah lebih jarang lagi. Kajian ini menyiasat penggunaan “past tense” dan “future events” dalam dua cerita Sherlock Holmes dan terjemahannya kepada bahasa Melayu menggunakan rangka penyelidikan “past tense” dan “future events” oleh Downing and Locke (2006) yang berdasarkan pada kaedah fungsional M.A.K Halliday. Dapatan kajian ini menunjukkan kebanyakan “past tense” dalam kedua-dua cerita Inggeris Sherlock Holmes digunakan untuk merujuk kepada situasi/peristiwa yang telah berlaku pada masa yang lalu sedangkan “future events” digunakan untuk menunjukkan situasi/peristiwa yang akan berlaku pada masa depan. Selain itu, dalam cerita-cerita yang diterjemahkan kepada Bahasa Melayu, “sudah” dan “telah” digunakan untuk menandakan yang situasi/peristiwa tersebut telah berlaku pada masa yang lalu semementara “akan” digunakan sebagai penanda yang situasi/peristiwa tersebut akan berlaku pada masa akan datang. Tambahan lagi, dapatan kajian ini juga menunjukkan cerita-cerita yang diterjemahkan kepada bahasa Melayu menggunakan leksikal dan frasa seperti “tadi”, “sekiranya” dan “seandainya”, “kata” dan “katanya” sebagai pengganti “past tense”. Demikian juga untuk “future events”, dapatan kajian ini menunjukkan yang cerita yang diterjemahkan kepada bahasa Melayu juga menggunakan leksikal dan frasa seperti “esok” dan “sehari dua ini” sebagai pelengkap untuk “future events” yang didapati dalam cerita Inggeris. Dengan ini diharapkan kajian ini dapat memberikan persepsi terhadap kaedah linguistik yang digunakan untuk menunjukkan “past tense” dan “future events” dalam bahasa yang tidak mempunyai sistem kala tersebut.

ACKNOWLEDGEMENTS

This dissertation would not have been possible without the guidance and the help of several individuals who in one way or another contributed and extended their valuable assistance in the preparation and completion of this study.

First and foremost, my utmost gratitude to my supervisor, Dr. Sridevi Sriniwass, for her support and guidance throughout my journey as a linguistic student from day one.

The lecturers at the Faculty of Languages and Linguistics, University of Malaya who taught me the beauty of languages and linguistics.

The staff of the Faculty of Languages and Linguistics, University Malaya for being accommodating to my queries pertaining to courses and dissertation matters.

Last but not the least, my family and friends who have always been there through ups and downs and to cheer me on towards the finish line.
