ACKNOWLEDGEMENT

First of all, I would like to thanks to my supervisor, Dr. Norizah Hassan for her guidance and encouragement during the period of supervising my work. Without her help, this study would never be accomplished.

Second, I would like to thank all my professors and lecturers for their encouragement and help during my study. Without the inspiring lectures, I would not have known what genre and multimodality are.

My sincere thanks also goes to my friends who always encourage and support me in my study. They are always there for me when I needed them. Without them, I would not complete my master program.

Finally, I would like to express my special thanks to my family, especially my mother who was supportive and gave me encouragement throughout my study. My mother has always been the source of strength for me to complete my master program and this thesis.
