

ACKNOWLEDGEMENT

In the name of Allah, the Most Gracious and the Most Merciful. All praises to Allah SWT for His blessing in completing this study. Special appreciation goes to my supervisors, Dr Hafez Salleh and Dr Faizul A. Rahim, for their invaluable support and help of constructive comments and suggestions that have contributed to the success of this thesis. I would like to thank the Dean and the Deputy Deans of Built Environment Faculty for their support and help towards my postgraduate affairs. Also, I thank all the office staff and technicians in the faculty for their kindness and co-operation.

Sincere thanks to all my postgraduate friends from all over the world. I am very grateful for their friendship, especially with whom I worked closely and puzzled over many of the same problems, Nur Mardhiyah Aziz and Rafikullah Deraman. Thanks for the memories that we have created throughout our journey.

My deepest gratitude goes to my beloved parents, Mr. Zainon Hamzah and Madam Nor Rasidah Abdul Rahman, for their faith in me. It was under their watchful eye that I am driven and able to solve challenges head on. I thank my brother for always being there for me. To my family-in-law, your understanding and kindness means a lot to me.

Most importantly, my warmest love goes to my dearest husband, Dr. Azlan Helmy Abd Samat. His inspiration, encouragement, patience, and unwavering love throughout my study were amazing. His tolerance is a testament of his unyielding devotion and love. I appreciate my little angels, Batrisyia Saffiyah and Aqeel Aisy, whom are my pillar of strength.

Thank you.
