

<b>LIST OF FIGURES</b>		<b>Page</b>
Figure 1.1	Phylogenetic tree containing the sequences of 118 papillomavirus types	9
Figure 1.2	Schematic presentation of the HPV genome	14
Figure 1.3	HPV life cycle in the epidermis	16
Figure 1.4	A schematic depiction of the prototypic HPV16 E7 protein	23
Figure 1.5	The phases of the mammalian cell cycle and the cyclic activation of cyclin- dependent kinases	27
Figure 1.6	A schematic comparison of hLin-9 homologues from different species	41
Figure 2.1	pMSCVpuro retroviral vector restriction map.	57
Figure 2.2	Vectors used for cloning	58
Figure 3.1	DREAM complexes constituents	86
Figure 3.2	Identification of DREAM complexes in T98G, C33A, SiHa and Caski cell lines	88
Figure 3.3	Depletion of E7 in SiHa and Caski cells	91
Figure 3.4	Immunoblot of DREAM complexes in Caski E7-depleted cells	93
Figure 3.5	G1 arrest induced by E7 depletion in Caski cells is Lin54-dependent	97
Figure 3.6	G1 arrest induced by E7 depletion in Caski cells is p130-dependent	99

Figure 3.7	Ectopic expression of various HPV E7 types in T98G cells	101
Figure 3.8	Immunoblot of DREAM complexes in T98G cells expressing various HPVE7 types	104
Figure 3.9	Schematic summary of the constructed p130mutants based on the p130wt	108
Figure 3.10	The p130mE7 mutant is unable to bind 16E7	110
Figure 3.11	Expression of various p130 mutants in C33a and CaSki cell lines	112
Figure 3.12	Identification of DREAM complex formation in CaSki cells transfected with p130 wt and the mutants p130mE7, p130PM22 and p130PM22/mE7	115
Figure 3.13	Flow cytometry (FACS) analysis in CaSki cells expressing various types of p130 mutants	116
Figure 3.14	Ectopic expression of HPV16E7 with various types of p130 mutants in T98G cell lines	120
Figure 3.15	Flow cytometry (FACS) analysis of T98G expressing HPV 16E7 and various types of p130 mutants	122

Figure 3.16	Expression of HPV48E7 with various types of p130 mutants in T98G cell lines.	125
Figure 3.17	Flow cytometry (FACS) analysis of T98G expressing HPV 48E7 together with various type of p130 mutants.	128
Figure 3.18	Depletion of Lin-54 in T98G, SiHa and Caski cells	130
Figure 3.19	Effects on cycle progression by depleting Lin-54 in T98G, SiHa and Caski cells	132
Figure 3.20	Analysis of G2/M genes suppression in Lin-54-depleted cells	133
Figure 3.21	Depletion of Lin-9 in CaSki cells	135
Figure 3.22	Depletion of B-myb in CaSki cells	136
Figure 4.1	<i>In vivo</i> phosphorylation sites in p130	150
Figure 4.2	Diagram of repressive p130/DREAM and activating B-myb/DREAM complex localised during cell cycle progression	155
