

LIST OF TABLES		Page
Table 1.1	Some examples of identified HPV genotypes and their origin	10
Table 1.2	Comparison of dREAM (<i>Drosophila melanogaster</i>), DRM (<i>Caenorhabditis elegans</i>) and DREAM/LINC (human) complexes constituents	43
Table 2.1	Sequences of probes used for real-time PCR amplification	51
Table 2.2	Oligonucleotides used for cloning into pLKO.1 vector	60
Table 2.3	The dilution and/or concentration of antibodies used in western blotting (WB) and immunoprecipitation (IP)	78
Table 2.4	The composition of the separation gels and the stacking gel used in SDS-PAGE	80
Table 3.1	The affinity of pocket protein binding in different types of HPV by LXCXE motif	102
