

CHARACTERISTICS AND ESTIMATES OF THE SIZE OF UNDERGROUND ECONOMY IN MALAYSIA

Contents	Page
Abstract	iii-vi
Acknowledgement	vii
List of tables	xiii-xiv
List of figures	xv-xvi
List of tables and figures in appendices	xvii-xviii

Chapters

Chapter One - Introduction

	Introduction	1
1.1	Second economy and Underground economy (UE)	1
1.1.1	Definition	1
1.1.2	Size and trend	3
1.1.3	Positive and negative effects	4
1.1.4	Determinants	4
1.1.5	Indicators	5
1.2	Gap of study and problem statement	6
1.3	Aim and objectives of study	7
1.4	Importance of study	7
1.5	Approach of study	8
1.6	Organisation of study	8

Chapter Two - Second Economy That Evade Taxes – Underground Economy

	Introduction	10
2.1	Definition	10
2.1.1	GDP as the official economy	10
2.1.2	Second economy and UE	12
2.2	The size of second economy	17
2.3	Growth trend of second economy	21
2.4	The positive and negative effects of second economy	27
2.5	Second economy in the future	32
2.6	Theory of second economy	34
2.7	Conceptual framework to estimate UE that evade taxes	36
2.8	Proxy indicators and characteristics of second economy	39
2.9	Income characteristics of UE	39
2.9.1	Income distribution	40
2.9.2	Income level	41

2.9.3	Type of income	42
2.9.4	Unemployment rate or changes in employment	45
2.9.5	Income of illicit activities	47
2.9.5.1	Bribery	48
2.9.5.2	Frauds, criminal breach of trusts, forgery and cheating	50
2.9.5.3	Drug trafficking	51
2.10	Proxy indicators of UE	52
2.10.1	Tax variables	53
2.10.2	Direct tax evasion	54
2.10.3	Direct tax gap	57
2.10.4	Indirect tax evasion - smuggling activities	58
2.10.5	Electricity consumption as economic physical resource	60
2.10.6	Cash in circulation as medium of transactions	61
2.11	Determinants of UE	62
2.11.1	Tax is a cost	63
2.11.2	Government intervention	65
2.11.2.1	Federal expenditure	65
2.11.2.2	Regulations	66
2.11.2.3	Contract rules	67
2.11.3	Economic performance	69
2.11.3.1	GDP per capita	70
2.11.3.2	Inflation	71
2.11.3.3	Financial crises	72
2.12	Law and enforcement	73
2.12.1	Enforcement on legal activities - efficiency	74
2.12.2	Enforcement on legal activities - effectiveness	76
2.12.3	Enforcement on illicit activities	78
2.13	Methods of estimating the size of second economy	79
2.13.1	Indirect method	80
2.13.2	Direct method	83
2.13.3	Past methods employed on Malaysian data	84
2.13.4	Appropriate estimation methods	87
	Summary	88

Chapter Three - Methodology

	Introduction	91
3.1	Scope of UE in this study	91
3.2	Approaches and methods employed in this study	92
3.3	Study framework of estimating the size of UE	95
3.4	Data collection	100
3.5	Data analyses	102
3.6	Equations of size estimates	106
3.7	Limitations and assumptions to qualify estimates	108
3.8	Priori economic association	110
3.9	Hypotheses – UE associate	112
3.9.1	Negatively with federal expenditure	112
3.9.2	Positively with economic crises	113

3.9.3	Positively with inflation	113
3.9.4	Positively with cash in circulation	113
3.9.5	Positively with electricity consumption	114
3.9.6	Positively with GDP per capita	114
3.9.7	Positively with unemployment rate, crime rate and bribery index	115
3.9.8	Positively with taxes	115
3.10	Diagnostic tests	116
3.10.1	Statistical tests on time series data	116
3.10.1.1	Unit root test	116
3.10.1.2	Logarithm form	116
3.10.1.3	Johansen co-integration test	116
3.10.1.4	Variance test	117
3.10.1.5	Multi-collinear effect	117
3.10.1.6	Pairwise Granger causality test	117
3.10.1.7	Autoregressive distributed lag estimates	118
3.10.2	Statistical tests on coefficients and model	118
3.10.2.1	Significant test	118
3.10.2.2	Best fit test	119
3.11	Double log regression models and equations	120
	Summary	121

Chapter Four - Visibility of Underground Economy in Malaysia

	Introduction	124
4.1	Country's economic performance	124
4.1.1	GDP	125
4.1.2	Inflation rate – Consumer Price Index	127
4.1.3	Electricity consumption	128
4.1.4	Savings and investment gap	130
4.1.5	Economic crises	132
4.2	Population characteristics	133
4.2.1	Labor force and direct tax base	133
4.2.2	Moderate unemployment rate	134
4.2.3	Impressive GDP per capita income	138
4.2.4	Skew income distribution	140
4.3	Societal characteristics	142
4.3.1	Private consumption	142
4.3.2	Cash consumption	144
4.3.3	Unequal consumption and opportunities	148
4.4	Federal account	149
4.4.1	Federal expenditure	149
4.4.2	Federal deficit	152
4.5	Tax burden	154
4.5.1	Direct tax	155
4.5.2	Indirect tax	158
4.6	Components of UE	159
4.6.1	Irregular economy	159
4.6.1.1	Direct tax non-compliance (Direct tax gap)	159

4.6.1.2	Indirect tax non-compliance (Indirect tax gap)	161
4.6.2	Illegal economy	164
4.6.2.1	Drug trafficking	167
4.6.2.2	Other illicit or commercial criminal activities	168
4.6.2.3	Bribery	170
4.7	Law at curbing and enforcement to deter UE	172
	Summary	173

Chapter Five - Characteristics of Underground Economy

	Introduction	176
5.1	Aggregate and disaggregate audit and investigation data	176
5.2	Indicators of unequal income distribution	177
5.3	UE of tax evasion from audit cases	179
5.3.1	Tax evaders and non-compliant activities	179
5.3.2	Tax evasion scheme	181
5.3.3	UE by GDP level	183
5.3.4	UE by economic industries and business sectors	185
5.3.4.1	Institutional (2003-2008)	185
5.3.4.2	Individual (2003-2008)	192
5.3.5	Income distribution of UE	195
5.3.5.1	Institutional (2003-2008)	195
5.3.5.2	Individual (2003-2008)	196
5.3.6	Income level of individual UE	198
5.3.7	Size of UE - based on micro data of reported and unreported income	199
5.3.7.1	Institutional (2005-2009)	199
5.3.7.2	Individual (2005 and 2008)	199
5.3.8	Potential tax loss of UE	201
5.4	UE of tax evasion from investigation cases	203
5.5	Enforcement ability at curbing UE	209
5.6	Enforcement efficiency in deterring UE	213
	Summary	215

Chapter Six - Underground Economy - size, growth, components and tax loss

	Introduction	217
6.1	Estimates based on non-compliance with filing of income tax form	217
6.2	Estimates based on unreported income of legal and illicit activities	219
6.3	Enforcement success rates	220
6.3.1	Enforcement success rate of irregular economy	220
6.3.2	Enforcement success rate of illegal economy	220
6.4	Estimates based on different data and statistical techniques	223
6.5	Size in time series relative to GDP	226
6.6	Growth in time series relative to GDP	229

6.7	Components of UE: illegal economy and irregular economy	231
6.8	Components of UE: non-compliant activities (illicit and legal)	237
6.8.1	Illicit activities	238
6.8.2	Indirect tax non-compliance – indirect tax gap	239
6.8.3	Direct tax non-compliance – direct tax gap	241
6.9	Direct tax loss	244
6.10	Indirect tax loss	248
6.11	“Black” wealth	249
	Summary	250

Chapter Seven - Underground Economy - variable relationships

	Introduction	252
7.1	Structural characteristics of data	252
7.2	Full double log model	254
7.3	Reduced double log model	255
7.4	Model interpretation – nominal compared with real variable models	260
7.4.1	Federal expenditure	261
7.4.2	GDP per capita	263
7.4.3	Inflation rate	264
7.4.4	Cash in circulation	264
7.4.5	Electricity consumption	265
7.4.6	Taxes	265
7.4.7	Economic crises (1997-98)	266
7.4.8	Other variables and overall interactions	267
	Summary	269

Chapter Eight - Conclusion

	Introduction	271
8.1	Overview	274
8.2	Findings	274
8.2.1	Size and growth of UE	274
8.2.2	Components of UE – irregular economy	278
8.2.3	Characteristics of UE - irregular economy	285
8.2.4	Tax gap and tax loss	281
8.3	Economic associations	283
8.3.1	GDP per capita and CPI	283
8.3.2	Cash in circulation	285
8.3.3	Electricity consumption	285
8.3.4	Tax role	286
8.3.5	Other factors	291
8.3.6	Government intervention	292
8.4	Contributions	294
8.5	Recommendations	302
8.6	Limitations and future study	309
	Summary	311
