

## LIST OF TABLES AND FIGURES IN APPENDICES

No.	Table	Title	Page
1	Table 2.1	Worldwide size of second economy (1999-2000)	i
2	Table 4.1	Information on indicator and determinant variables	iii
3	Table 4.2	Non compliance of filing tax form: category of tax group	vi
4	Table 4.3	Non compliance of filing tax form: 2001-2006	vi
5	Table 4.4	Average percentage of employed labor force between age group of 35 and 64	vii
6	Table 4.5	Indirect tax rates ranging from 10% - 300%	vii
7	Table 5.1	Household income distribution	viii
8	Table 5.2	Gini coefficient	viii
9	Table 5.3	Number of institutional tax evaders	ix
10	Table 5.4	Top five institutional tax evaders - economic industries	ix
11	Table 5.5	Amount of unreported income of institutional tax evaders	ix
12	Table 5.6	Top five institutional unreported income - economic industries	xiii
13	Table 5.7	Individual tax evaders – micro analyses	x
14	Table 5.8	Number of individual tax evaders	xii
15	Table 5.9	Amount of unreported income of individual tax evaders	xii
16	Table 5.10	Number of individual tax evaders by 21 business sectors	xiii
17	Table 5.11	Amount of individual unreported income by 21 business sectors	xiii
18	Table 5.12	UE age association compared to labor force structure	xiv
19	Table 6.1	Computation of direct tax rates	xv
20	Table 6.2	Computation of size and growth of UE relative to GDP – annual and moving average	xvi
21	Figure 7.1	E-view output of proxy variables at level	xvii
22	Figure 7.2	E-view output of proxy variables in log form	xviii
23	Table 7.1	Normality tests of the proxy variables	xviii
24	Table 7.2	Correlation tests of the proxy variables	xx
25	Table 7.3	Auxiliary regression	xx
26	Table 7.4	Unit root tests – Augmented Dickey-Fuller test statistic	xxi
27	Table 7.5	Co- integration tests	xxii
28	Table 7.6	Pairwise Granger Causality tests	xxvii
29	Table 7.7	List of variables used in the regression models	xxxi
30	Table 7.8	UE in full models	xxxii
31	Table 7.9	UE in reduced models of nominal variables	xxxiii
32	Table 7.10	UE in reduced models of real variables	xxxv

33	Table 7.11	Ten equations of nominal models showing significant variables	xxxvii
34	Table 7.12	Ten equations of real models to compare with nominal models	xxxviii
35	Table 7.13	UE models - insignificant coefficients among cash, M1 aggregates , GDP percapita and CPI collectively	xxxix
36	Table 7.14	Models of the official economy - insignificant electricity consumption and federal expenditure	xxxix
37	Table 7.15	Models of the potential economy - insignificant electricity consumption and federal expenditure	xi
