ACKNOWLEDGEMENT

I wish to express my sincere thanks to my mentor, Dr Mohd Nazari Ismail for his invaluable guidance and support in preparation of this piece of work. His involvement with the work from preliminary stages and in revision had offered stimulating feedback. Certainly, his teaching had made many useful suggestions without which, completion of this research would not be possible.

Among those who have provided constructive ideas and helps were my fellow MBA class-mates, my fellow company's colleagues, University's staff and many others, a word of thanks may not well justify their contributions.

Never forgetting is my understanding boss, Mr Inoue and the Senior Administration Manager, Ms Alice Wong for their undivided supports and encouragements. The permission to grant Saturday off for my pursuance of MBA course was indeed greatly appreciated.

Lastly but definitely not least, my dear wife, Sherine who had given me her whole-hearted supports throughout the course and more so, for her labourous efforts in typing as well as editing the manuscripts. I must say - Thank You. With the lovely daughter, Shi Wei that never fail to disturb my works, had nevertheless spur me to complete this work earlier than expected.
