## ACKNOWLEDGEMENT

I would like to express my gratitude to my former supervisor, Dr Liaw Shu Hui who agreed to take on the job of supervising me, and who, despite her many commitments, devoted so much of her valuable time and effort to guiding, helping and encouraging me in the preparation of this project paper.

My heartfelt thanks go to Associate Professor Tey Nai Peng, who, despite his many commitments, agreed to supervise me when Dr. Liaw had to leave for Scotland. His unwillingness to let me waste all the years of studying for all the other courses had led me to finally finish this paper.

Last but not least, my appreciation to my wife, Puan Wan Salmiah Eshak, for her understanding and constant support throughout the period of preparation of my project paper.
