

## ABSTRACT

Interactions between supervisor and supervisee during consultation particularly in the postgraduate level are essential in the completion of a thesis or dissertation. In most interactions, both speakers; the supervisor and the supervisee assert their identities who they are. Such scenario has been an important phenomenon to examine how stance-taking and identity construction are portrayed. This research specifically examined 10 conversations between supervisors and supervisees during research consultations at the University of Malaya, Kuala Lumpur, Malaysia. The study combined the Stance Triangle and Model of Stance Marker as theoretical framework in analyzing the construction of identity between supervisors and supervisees. In addition, conversation analysis was used as an approach in analyzing the data. The findings of the study show that in supervisor-supervisee interaction certain stages are followed in the conversational structure. This study reveals that there are 6 stages in supervisor-supervisee interaction, such as, making follow-up, testing the knowledge of the supervisee, giving suggestion, seeking for clarification, giving recommendation and making conclusion. In every stage, it shows that different stance takings are used by both supervisors and supervisees. Furthermore, the study reveals that epistemic stance markers, textual stance markers, attitudinal stance markers and deontic stance markers are commonly used. In every stance that supervisors and supervisees take, they tend to position their identities. Such identities shift from one stage to another. Generally, the supervisors position themselves as mentor, expert, counselor, knowledgeable, controlling and responsible. On the other hand, supervisees position themselves as mentee, neophyte, counselee, learner, follower and grateful.

## ABSTRAK

Interaksi antara penyelia dan supervisee semasa rundingan terutamanya dalam peringkat pengajian lepasan ijazah adalah penting dalam menyiapkan tesis atau disertasi . Dalam kebanyakan interaksi, kedua-dua penceramah; penyelia dan supervisee yang menegaskan identiti mereka siapa mereka. Senario seperti itu telah menjadi fenomena penting untuk mengkaji bagaimana pendirian pengambilan dan pembinaan identiti digambarkan . Kajian ini secara khusus examined 10 perbualan antara penyelia dan pelajar pasca siswazah se masa perundingan di Universiti Malaya , Kuala Lumpur, Malaysia. Kajian ini digabungkan Segitiga Pendirian dan Model Stance Marker sebagai kerangka teori dalam menganalisis pembinaan identiti di antara penyelia dan supervisees . Di samping itu, analisis perbualan telah digunakan sebagai pendekatan dalam menganalisis data. Hasil kajian menunjukkan bahawa interaksi penyelia supervisee berikut peringkat tertentu di dalam struktur perbualan. Kajian ini mendedahkan 6 peringkat dalam interaksi penyelia supervisee seperti membuat susulan, menguji pengetahuan supervisee , memberikan cadangan, mencari penjelasan, memberi cadangan dan membuat kesimpulan. Dalam setiap peringkat ia menunjukkan bahawa perolehan pendirian yang berbeza berlaku ini digambarkan oleh penanda pendirian yang digunakan oleh kedua-dua penyelia dan supervisees . Tambahan pula , kajian itu mendedahkan bahawa penanda epistemic pendirian , penanda pendirian teks , penanda pendirian sikap dan pendirian penanda deontic adalah penanda pendirian biasa digunakan. Dalam setiap pendirian penyelia dan supervisees mengambil mereka cenderung untuk meletakkan identiti mereka. Identiti itu beralih dari satu peringkat ke peringkat yang lain. Secara amnya, penyelia meletakkan diri mereka sebagai mentor, pakar,

kaunselor , berilmu , mengawal dan bertanggungjawab. Sebaliknya , supervisees diri mereka sendiri sebagai mentee, pemula , counselee , pelajar , pengikut dan bersyukur.

## ACKNOWLEDGEMENTS

I would like to express my deepest and warmest gratitude to Allah who gives me the patience and strength to finish this work, then to my dear supervisor Dr. Francisco Perlas Dumanig for his assistance, patience and continuous support throughout the writing of the thesis. I am so thankful for his guidance, insights, and friendliness which helped a lot in the completion of this thesis.

I would like to express my deep thanks to the Faculty of Languages and Linguistics and to all my lecturers who taught me various courses before venturing this research. I also thank all my friends and classmates in the English Department at the Faculty of Languages and Linguistics, University of Malaya, who provided me with insights, advice and support throughout my work. A special word of gratitude is also due to Dr. Kais Amir Kadhim, Rajaa Emad and Amal Mechraoui who motivated me to finish this research.

Finally, I would like to express my deepest gratitude and indebtedness to all my family members especially to my parents who give me support and encouragement throughout my study.
