

TABLE OF CONTENTS

ACKNOWLEDGEMENTS	ii
TABLE OF CONTENTS	iii
LIST OF TABLES	viii
LIST OF FIGURES	x
LIST OF ABBREVIATIONS	xi
ORIGINAL LITERARY WORK DECLARATION	xii
ABSTRACT	xiii
ABSTRAK	xv
Chapter 1	
1.0 INTRODUCTION	1
1.1 Background of the Study	1
1.2 Statements of the Problems	3
1.3 Significance of the Study	4
1.4 General Objectives	6
Chapter 2	
2.0 LITERATURE REVIEW	7
2.1 Feed Formulation	7
2.1.1 Factors to be considered in Feed Formulation	7
2.2 Feed Processing	11
2.3 Significant Milestones of Fish Meal Replacement Research	13
2.4 Tilapia Culture	16
2.4.1 Tilapia Production	17
2.4.2 Nutrient Requirements for Tilapia	18
2.5 Fish Meal in Aquaculture Diets	21
2.5.1 Current Production of Fish Meal	23

2.6	Alternative Protein Source to Fish Meal	25
2.6.1	<i>Zophobas morio</i> meal	27
2.6.2	<i>Pleurotus sajor caju</i>	30
2.7	Limitations of the Utilization of Fish Meal Substitutes	33
2.7.1	Growth Performance	33
2.7.2	Final Product Quality and Implication to Human Nutrition	34
2.7.3	Feed Acceptability and Palatability	34
2.7.4	Chitin Content	35

Chapter 3

3.0	MATERIALS AND METHODS	36
3.1	Experimental Facilities	36
3.1.1	Experimental System for Growth Trial	36
3.1.2	Digestibility Study	36
3.2	Experimental Animals and Feeding Trials	38
3.2.1	Weighing Procedure for Sampling	38
3.3	Diet Formulation and Preparation	39
3.4	Methods of Proximate Analysis	42
3.4.1	Moisture	42
3.4.2	Ash	42
3.4.3	Crude Protein	43
3.4.4	Crude Lipid	43
3.4.5	Crude Fiber	44
3.4.6	Nitrogen Free Extractives	44
3.5	Amino Acid Analysis	45
3.6	Fatty Acid Analysis	47
3.7	Chromic Oxide Analysis	47
3.8	Analysis of Experimental Data	48

3.9	Statistical Analysis	50
-----	----------------------	----

Chapter 4

4.0 Chemical Evaluation of Super Worm Meal for Juvenile Red Tilapia, *Oreochromis spp.*

4.1	Introduction	51
4.2	Materials and Methods	53
4.2.1	Experimental Set-up	53
4.2.2	Diet Preparation	54
4.2.3	Proximate Analysis	54
4.2.4	Statistical Analysis	54
4.3	Results	55
4.3.1	Proximate Composition of Ingredient	55
4.4	Discussion	58

Chapter 5

5.0 Evaluation of Different Mixtures of Super Worm Meal as Dietary Protein Source in Practical Diet of Juvenile Red Tilapia

5.1	Introduction	62
5.2	Materials and Methods	63
5.2.1	Experimental System and Animal	63
5.2.2	Diet Preparation	64
5.2.3	Analysis of Experimental Data	65
5.2.4	Monitoring of Water Quality	65
5.2.5	Proximate Analysis	65
5.2.6	Statistical Analysis	65
5.3	Results	66
5.3.1	Proximate Composition of Diets	66
5.3.2	Growth Performances and Feed Utilization	67
5.3.3	Water Quality Parameter	68

5.3.4	Whole Body Composition	69
5.4	Discussion	70
Chapter 6		
6.0	Effects of Amino Acid Supplementation in Super Worm Based Diets on Growth Performance and Feed Utilization of Juvenile Red Tilapia	
6.1	Introduction	74
6.2	Materials and Methods	77
6.2.1	Experimental System and Animal	77
6.2.2	Diet Preparation and Feeding Regime	77
6.2.3	Analytical Procedures and Analysis of Experimental Data	78
6.2.4	Statistical Analysis	78
6.3	Results	79
6.3.1	Proximate Composition of Diets	79
6.3.2	Growth Performance and Feed Utilization	81
6.3.3	Whole Body Composition	82
6.3.4	Water Quality Parameter	83
6.4	Discussion	84
Chapter 7		
7.0	Effect of Mushroom Supplementation as a Prebiotic Compound in Super Worm Based Diet on Growth Performance of Juvenile Red Tilapia	
7.1	Introduction	87
7.2	Materials and Methods	89
7.2.1	Experimental System and Animal	89
7.2.2	Experimental Diets	90
7.2.3	Analysis of Experimental Data	90
7.2.4	Statistical Analysis	91
7.3	Results	91
7.3.1	Proximate Composition of Diets	91

7.3.2	Growth Performance and Feed Utilization	92
7.3.3	Whole Body Composition	93
7.3.4	Water Quality Parameter	94
7.4	Discussion	95
Chapter 8		
8.0	General Conclusions and Recommendations	98
9.0	References	105
10.0	Appendices	130
