

LIST OF TABLES

		Page
Table 1.1	Standard reduction electrode potentials at 25 °C	8
Table 1.2	The aqueous saturation solubility of some metal methanesulfonates, chlorides and sulfates at room temperature (22 °C)	12
Table 1.3	Saturation solubility of some lead salts: temperature and solubility units in parentless	14
Table 1.4	Characteristic and application of copper –lead bearing alloys	16
Table 1.5	Designation and nominal composition of copper-lead bearing alloys	17
Table 2.1	Typical composition of the electrodeposition Cu-Pb alloys generic bath	20
Table 3.1	Reduction reaction during the Cu-Pb alloy deposition from MSA bath	34
Table 3.2	Quiescent MSA bath at a room temperature	36
Table 3.3	Mass electrodeposited layers at different current densities	37
Table 3.4	Gives the electrodeposition efficiency with different current density in MSA bath	40
Table 3.5	XRD intensities of Cu-Pb alloy via different applied current densities	44
Table 3.6	XRD Analysis of electrodeposited Cu-Pb obtained at different applied current densities	45
Table 3.7	EDX result of the percentage of elements in Cu-Pb alloy electrodeposited from MSA electrolyte at different current densities	59
