	PAGE
ABSTRACT	ii
ABSTRAK	iv
ACKNOWLEDGEMENTS	vi
LIST OF FIGURES	xv
LIST OF TABLES	xviii
LIST OF SYMBOLS AND ABBREVIATIONS	xx
CHAPTER ONE	
INTRODUCTION	1
Objectives	5
CHAPTER TWO	
LITERATURE REVIEW	
2.1 Model of study and fundamental principles	7
2.2 Current treatment for obesity and type 2 diabetes	10
2.3 Antioxidants	12
2.4 Mushrooms	14
2.4.1 Edible mushrooms	16
2.4.2 Medicinal mushrooms	17
2.4.2.1 Bioactive compounds derived from medicinal mushroom	21
2.5 <i>Pleurotus</i> spp.	

2.5.1	Origin	24
2.5.2	<i>Pleurotus</i> spp. industry in Malaysia	27
2.6	The fruiting bodies of <i>Pleurotus sajor-caju</i> (Fr.) Singer	29
2.6.1	Chemical constituents of <i>P. sajor-caju</i>	31
2.7	Anti-obesity and anti-diabetic activity of mushrooms	33
CHAPTER THREE		
ISOLATION AND IDENTIFICATION OF BIOACTIVE COMPOUNDS FROM FRESH FRUITING BODIES OF <i>P. SAJOR-CAJU</i>.		
3.1	Introduction	35
3.2	Materials and Methods	
3.2.1	Materials	36
3.2.2	Methodology	
3.2.2.1	Mushrooms sample	38
3.2.2.2	Isolation and identification of compounds from ethyl acetate extract of <i>P. sajor-caju</i>	40
3.2.2.3	Instrumentation	41
3.2.2.4	Isolation and purification of crude polysaccharides from hot-aqueous extract of <i>P. sajor-caju</i>	42
3.3	Results and Discussion	
3.3.1	Extraction of fruiting bodies of <i>P. sajor-caju</i>	44
3.3.2	Isolation of secondary metabolites of <i>P. sajor-caju</i> from EAE	47
3.3.3	Identification of compounds in EP2, EP3, EP4 and EP5 using GCMS analysis	48

3.3.4	Identification of ergosterol	64
3.3.5	Identification of compounds in BE using GCMS analysis	66
3.3.6	Isolation and purification of crude polysaccharides from hot-water extract	68
3.3.7	Importance and medicinal properties of some identified compounds.	
3.3.7.1	Ergosterol	69
3.3.7.2	Fatty acids analysis	70
3.3.7.3	Phenolic compounds	72
3.3.7.4	Cinnamic acids	73
3.3.7.5	Nicotinamide	74
3.3.7.6	Polysaccharides	75
3.4	Conclusion	77
CHAPTER FOUR		
ANTIOXIDANT ACTIVITY OF FRESH FRUITING BODIES OF <i>P. SAJOR-CAJU</i> EXTRACTS		
4.1	Introduction	79
4.2	Materials and Methods	
4.2.1	Materials	80
4.2.2	Methodology	
4.2.2.1	Extracts	81
4.2.2.2	β -carotene bleaching assay	82
4.2.2.3	Ferric reducing antioxidant power assay (FRAP)	83
4.2.2.4	Trolox equivalents antioxidant capacity assay	84

	(TEAC)	
	4.2.2.5 Lipid peroxidation assay	85
	4.2.2.6 Total phenolic assay	85
	4.2.2.7 Inhibition of lipid peroxidation assay on cooking oil	86
	4.2.2.8 Statistical analysis	87
4.3	Results and Discussion	
	4.3.1 Effects of <i>P. sajan-caju</i> extracts on antioxidant activities	88
	4.3.2 Correlation between antioxidant activities and total phenolic content	97
	4.3.3 Effects of <i>P. sajan-caju</i> extracts on lipid peroxidation and storage effect in cooking oil	99
	4.3.4 Comparison of the antioxidant activities assessed by the different methods	106
4.4	Conclusion	107
CHAPTER FIVE		
EFFECTS OF <i>P. SAJAN-CAJU</i> EXTRACTS ON PROLIFERATION, LIPOGENESIS AND LIPOLYSIS IN 3T3-L1 CELL LINES.		
5.1	Introduction	109
5.2	Materials and Methods	
	5.2.1 Materials	110
	5.2.2 Methodology	
	5.2.2.1 Cell culture	112
	5.2.2.2 Extracts	114
	5.2.2.3 Colorimetric MTT assay	115

5.2.2.4	Lipogenesis assay	116
5.2.2.5	Lipolysis assay	118
5.2.2.6	Protein carbonyl content assay	119
5.2.2.7	Lipid peroxidation assay	119
5.2.2.8	Gene expressions using real-time RT-PCR	120
5.2.2.9	Real-time RT-PCR	122
5.2.2.10	Calculations	126
5.2.2.11	Statistical analysis	127
5.3	Results and Discussion	
5.3.1	Effects of <i>P. sajor-caju</i> extracts on proliferation of 3T3-L1 cells	128
5.3.2	Effects of <i>P. sajor-caju</i> extracts on lipogenesis of 3T3-L1 cells	130
5.3.3	Effects of <i>P. sajor-caju</i> extracts on lipolysis of 3T3-L1 cells	131
5.3.4	Effects of <i>P. sajor-caju</i> extracts on of oxidative stress indices- lipid hydroperoxides and protein carbonyl content 3T3-L1 cells	134
5.3.5	Effects of <i>P. sajor-caju</i> extracts on gene expression	136
5.4	Conclusion	144
CHAPTER SIX		
EFFECTS OF POLYSACCHARIDE (GE) ON HIGH FAT DIET-INDUCED METABOLIC CHANGES AND OXIDATIVE STRESS IN C57BL/6J (<i>ob/ob</i>) OBESE MICE.		

6.1	Introduction	146
6.2	Materials and Methods	
6.2.1	Materials	147
6.2.2	Methodology	
6.2.2.1	Animals and experimental design	148
6.2.2.2	Oral glucose tolerance test (OGTT)	150
6.2.2.3	Sample collection and analytical methods	151
6.2.2.4	Insulin sensitivity test	153
6.2.2.5	DNA damage test	153
6.2.2.6	Antioxidant enzymes	154
6.2.2.7	Gene expressions	155
6.2.2.8	Statistical analysis	155
6.3	Results and Discussion	
6.3.1	Effects of GE on the changes in body weight	156
6.3.2	Effects of GE on glucose tolerance	163
6.3.3	Effects of GE on blood glucose, serum insulin and insulin resistance index	165
6.3.4	Effects of GE on the oxidative stress in urine samples (protein carbonyl, lipid hydroperoxide, uric acid and DNA damage levels)	168
6.3.5	Effects of GE on enzymatic and non-enzymatic antioxidant levels in liver, kidney and serum	172
6.3.6	Effects of GE on the expression of adipokines and inflammatory markers in adipose tissue	177
6.4	Conclusion	187

CHAPTER SEVEN

GENERAL DISCUSSION & CONCLUSION

189

7.1 Recommendations for future research
