Certification

We certify that the above consignment of Laboratory mice & rats were born and bred in this facility, which is an approved breeding facility for the import of such animals by Jabatan Perkhidmatan Veterinar(Department of Veterinary services) Malaysia.

The mice & rats are found to be healthy and free from any clinical signs of infectious or contagious disease at the time of export.

No clinical signs of tularemia, myxomatosis, rabies, Leptospirosis, viral haemorrhagic disease of lagomorphs, and negative result of Lymphocytic choriomeningitis, Korean haemorrhagic fever (Hantaan virus infection) by ELISA Serology testing or any disease notifiable in the country of export for the preceding twelve (12) months prior to export. No case of monkeypox has occurred in the facility within 6 months prior to export.

The mice & rats have not been inoculated with any microorganisms nor been in contact with animals which have been inoculated with any microorganisms.

The mice & rats are Specific-Pathogen-Free (SPF) and are free of contagious ectoparasites and helminth endoparasites. The shipping container is constructed of sterilized materials. The vehicle transporting mice from BioLASCO breeding facility is sanitized prior to transportation of the mice & rats, and only BioLASCO mice & rats travel on this truck.
