

ACKNOWLEDGEMENTS

Bismillah-hirrohman-nirrohim

Many great people have been instrumental in bringing this thesis to fruition. My most sincere appreciation goes to Universiti Tun Hussein Onn Malaysia for granting me scholarship under Civil Service Department, Government of Malaysia for granting me the scholarship and study leave from 2008 to 2012. I owe a special debt of gratitude to my supervisors Dato' Professor Ir Dr Roslan Hashim and Associate Professor Dr Samsuddin Taib from University Malaya, who gave me a lot of their time, advice, support, encouragement and providing critical comments whenever necessary throughout the course of this research study.

Last but not least, I wish to dedicate my sincere appreciation and thanks to my parents – Tajul Baharuddin bin Mohd Salleh and Maimon binti Nayan and my family for their invaluable support and encouragement. To my beloved wife Nurida binti Mohd Yusop who helped in so many ways and who always understood what I was trying to do. To my children, Muhammad Iqbal, Liyana Suraya, Anis Safiah, Mohamad Ikhsan and Nur Aliya Batrisya although too young to understand my being away, gave much inspiration and spirit during the study.
